BIBLIOGRAPHY

Host factors important in immune surveillance against tumours.

Incidence of gingivitis as related to sex, occupation, tobacco consumption, tooth brushing and age.

In Proceedings of "International Seminar on Oral Leukoplakia and Associated Lesions to Tobacco Habits".

The relation of the clinical picture to the histopathology of snuff dippers lesions in a Swedish population.

Changes in serum IgD in cigarette smokers.
Barrett, T.J. (eds).

Smokeless tobacco: A potential health hazard for children.

Salivary Immunoglobulin A levels in normal subjects, tobacco smokers and patients with minor aphthous ulceration.

Influence of cigarette smoking on vascular reaction during experimental gingivitis.

Brandtzaeg, P. and Jamison, H.C. (1964a).
A study of periodontal health problems and oral hygiene in Norwegian Army Recruits.
J. Periodont., 35: 308-310.

Brandtzaeg, P. and Jamison, H.C. (1964b)
The effect of controlled cleansing of the teeth and oral hygiene in Norwegian Army Recruits.
N-Nitrosoproline, an indicator of N-Nitrosation of amines in processed tobacco.

Budner Lewis, A. (1955)
Effects of smoking on oral mucosa.

Carranza, F.A. (eds.). Glickman's Clinical Periodontology,
Eighth Edition,

The effects of intraarterial epinephrine and nicotine on gingival circulation.

Corverand, J. and Kraal, J.H. (1979)
Effect of tobacco smoking on function of Polymorphonuclear Leucocyte.
Infection and Immunity, 23: 577-581.

Cullen, J.W. (1990)

Oral mucosal lesions found in smokeless tobacco users.
Jour. Amer. Dent. Assoc., 121: 117-123.
Effect of cigarette smoking on the transition dynamics in experimental gingivitis.

Dental Annual (1986)
Unsolved Problem in Oral Cancer - A Review.
pp. 127-147.

Association between smoking different tobacco products and periodontal diseases index.

Finklea, J.F., Hasseblad, V. and Riggan, W.B. (1971)
Cigarette smoking and haemaglutination response to influenza after natural disease and immunisation.
Amer. Rev. Respir. Disease, 104: 368-76.

Natural killer cell activity and immunoglobulin level associated with smoking in human subjects.

Francisco Rivera-Hidalgo. (1986)
Smoking and periodontal disease: A Review of Literature.
Immunoglobulin levels in smokers and non-smokers.
Ann. Allergy, 41: 261-263.

Self report of habitual tobacco usage in American youth and quitter: A Review and Drawbacks.

T. lymphocyte subsets in smoking and lung cancer

Green, J.C. (1960).

Oral tissue alterations associated with the use of smokeless tobacco by teenagers.

Smokeless tobacco associated oral changes in juvenile, adult and geriatric patients.
Gerodontics, 2: 87-98,
An epidemiological study of periodontal disease in
Trivandrum, India.
Incidence of oral cancer and natural history of
precancerous lesions in a 10 year follow-up study of
Indian villagers.
Intervention study for primary prevention of oral cancer
among 36,000 Indian tobacco users.
Lancet, 1: 1235-1238.
A primary prevention study of oral cancer among Indian
Villagers. 8 year follow-up results.
In Hakama, M., Bural, V., Cullen, J.W. (eds.). Evaluating
effectiveness of primary prevention of cancer.
International Agency for Research on Cancer, Lyon,
France.
IARC Scientific Publication No. 103.
Effect of cessation of tobacco use on the incidence of
oral mucosal lesions in a 10 year follow-up study of
12212 users.
Oral Diseases, 1: 54-59.
Salivary Immunoglobulin-A in Periodontal Disease.

Validation of self reported smoking behaviour.
Biochemical analysis of cotinine and thiocynate.

Abnormal phagolysosome Fusion in pulmonary alveolar macrophages.

Cyclic-nucleotide content of gingival tissue of smokers and non-smokers.

Hirayama, T. (1966)
An epidemiological study of oral and pharyngeal cancer in Central and South-East Asia.

A clinical, histomorphological and histochemical study of snuff induced lesions of varying severity.
Environmentally induced changes in immunological function. Acute and chronic effects of inhalation of tobacco smoke and other atmospheric contaminants in rat and experimental animals.
Holt, P.G., Keast, D. and Mackenzie I.S. 1978
Animal model of human disease: immune-suppression associated with cigarette smoking.
Am. J. Pathol. 91: 791-794.
Hughes Miller, J. 1985
Numerical and bronchial alterations in circulating lymphocytes in cigarette smokers.
Hunter, C.M., Croff, J.B. and Burke, G.L. 1986
Longitudinal pattern of cigarette smoking and smokeless tobacco in youth. The Bogalusa Heart Study.
IARC (1985)
IARC Monographs on the evaluation of the carcinogenic risk of chemicals to humans. Vol. 37 Tobacco habits other than smoking: Betel-Quid and Areca-nut chewing and areca-related nitrosamines. Lyon, France: International Agency for Research on Cancer.
IARC (1986).

IARC Monographs on the evaluation of the carcinogenic risk of chemicals to humans, Vol.38, Tobacco smoking, Lyon, France (International Agency for Research on Cancer).

Epidemiologic studies with implications for cancer control programmes, ICMR Bull., Vol.22, pp.29-34, (Indian Council of Medical Research).

Directorate of Tobacco Development, Ministry of Agriculture and Irrigation, Govt. of India.

Epidemiologic patterns of smoking and periodontal disease in the United States.

James,E.F. and Reynolds,S.R. (eds.).

Postagladin E₂ and interleukin-1 B levels in smokeless tobacco induced oral mucosal lesions.

The effect of arecoline on the palatal and buccal mucosa of the wistar rat. An optical and electron microscopic study.

A comparison of antibody responses to smokers and patients with chronic bronchitis.

Immunoglobulin estimation of blood and saliva in human recurrent oral ulceration.

The measurement of ultrastructural changes induced by tobacco smoke in rat alveolar macrophages.

Smokeless tobacco habits and oral lesions in dental patients.

Gingival inflammation measurement index.

The diagnostic uses of saliva - Review Article.

Salivary immunoglobulins in patients with cropharyngeal and bronchopulmonary carcinoma.
Cancer, 31: 1408-1413.

The influence of time of examination on smoking and oral debris index

Relation of betel leaf chewing to periodontal disease.
Epidemiologic and histologic study of oral cancer and leukoplakia among 50,915 villagers in India.
Cancer, 24: 832-849.

An intervention study of oral cancer and precancer in rural Indian populations: A preliminary report.

The Human IgA System: A reassessment.

Comparative studies of the biological properties of human Immunoglobulin A (IgA) subclasses.
Protides of the biological fluids, 36:173-182.

Immunoglobulin A (IgA) subclasses.
Monographs in Allergy., 19: 277-301.

Reversible alterations in immunoregulatory T cells in smoking.
Chest., 82: 526-529.

A classification of marginal tissue recession.
Relation between tobacco consumption and oral health in Swedish school children.

Nicotine induced depression of lymphocyte growth.

Oral manifestations of chewing habits (A Clinico-pathological study). Dissertation submitted to Gujarat University, Ahmedabad India in partial fulfilment for the Degree of Masters in Dental Surgery in Periodontics Branch.

Smokeless tobacco effects on monocyte secretion of PGE\textsubscript{2} and IL-1B.

Pindborg, J.J. (1947).
Tobacco and gingivitis: I. Statistical examination of the significance of tobacco in formation of calculus.

Pindborg, J.J. (1949).
Tobacco and gingivitis. II. Correlation between consumption of tobacco, gingivitis and calculus.
Pindborg, J.J. (1951).
Gingivitis in Military personnel with special reference to ulceromembranous gingivitis.

A comparison of the use of smokeless tobacco in rural and urban teenagers.

The effects of smokeless tobacco on clinical parameters of inflammation and gingival crevicular fluid levels of Prostaglandin E2, Interleukin 1 and Interleukin 1B.

Effect of tobacco smoking on periodontal tissue of 15 year old school children.

Preber, H., Kant, T. and Bergstrom, J. (1980).
Cigarette smoking, oral hygiene in Swedish Army recruits.

The periodontal disease index.

Periodontal effects associated with the use of smokeless tobacco.
Some epidemiological characteristics of periodontal diseases in series of urban population.

Tobacco dependence: Is nicotine rewarding or aversive?.

Toxicity of cigarette smoke components.

A study of Danish snuff induced Oral Leukoplakia.

Chronic smoking and salivary Immunoglobulin A (An Immunologic Study). Dissertation submitted to Gujarat University, Ahmedabad, India in partial fulfilment for the Degree of Masters in Dental Surgery in Periodontics Branch

The association of local factors with gingivitis.
Sugars and Fluorides in Chewing Tobacco and Snuff.

Periodontal disease and oral cleanliness in tobacco smokers.

On Chewing Tobacco.

Oral leukoplakia and malignant transformation - A followup study of 257 patients.

Tarsan, P.S. and Silvette, H. (eds.)

Effect of cigarette smoking on primary and secondary humoral responses of mice.

Recovery of immune system after cigarette smoking (MICE),

Waerhaug, J. (1967).

Wahi, P.N., Mittal, V.P. and Lahiri, B. (1970).
Epidemiologic study of precancancerous lesions of oral cavity: A preliminary report.

The relationship between smoking and total IgE levels.

WHO. (1980)

WHO. (1983)

Smoking Control Strategies in Developing Countries.

WHO. (1988)

Smokeless Tobacco Control.

WHO. (1990)

Women and Tobacco.

Dental and Oral effects observed in long term tobacco chewer.
