Special Acknowledgements
A Thank You from Chitranshu

Today when I reflect upon my stay in IMTECH from the day I joined here, I feel a sense of debt to some persons who by their deeds and actions made my life easier and jovial everyday. I believe it’s necessary to acknowledge all of these people, who I know have directly or indirectly shaped my life and work. Adversity is often one of our best teachers. Even the people that somehow gripped my meagre imagination, violated me in some way, even those people are due their honor for what they have taught me. I wish to acknowledge all for their role in my life. However, this page is specifically written to express my appreciation of those people who stand out most notably in my mind during my six and a half years of stay here.

There is one person in my life that urged me on by way of his untiring support and seemingly unlimited belief in me, to that man, all else pales. He took me in his lab at a juncture, when I was almost on the precipice of disaster career wise and had no where to go. There will be very few scientists who would take a student at this stage, specially since I had already lost almost two and a half years and moreover I left the director’s lab. It was only because of his confidence and faith in me that I have been able to fulfill my objective. Thank you Dr. Anand Bachhawat for providing me the opportunity to work with you. I admire and respect him for his caring and loving ways, patience, scientific observations, constant pushing and the amount of freedom he gives to his students. His excitement and willingness to provide feedback made the completion of this research an enjoyable experience. I have to say that I was very fortunate to have a mentor like him.

A special word of thanks goes to Dr. Ganesan who was more than generous with his expertise and precious time. His feedback and valuable guidance helped me a lot in carrying out microarray experiments.

I can never forget the never ending motherly affection, warmth, fondness, love and constant encouragement of Nandita maam. We shared camaraderie of our own and I will always miss her company wherever I go.

I am obliged to Dr. Amit Ghosh, former Director, for providing excellent institutional infrastructure and ambient atmosphere for research work. My first exposure to science was under him and I learnt a lot of things in his lab, which helped me to carry out my experiments independently in the later part of my research.

I am highly grateful to Dr. Thungapatra for not only teaching me the basics of molecular biology but also for her help and support when I changed my lab.

I am highly thankful to Dr. Ganesan, Dr. Mondal and Dr. Jagmohan Singh for their help in DNA sequencing.

I would like to express my token of thanks to all my labmates Srikanth, Dwaipayan, Davinder, Jaspreet, Neha, Niloy, Rekha, Sanjoy, Mannan and Indrani for maintaining a cordial and buoyant atmosphere in the lab. Friendship with Niloy was sweet but in sweetness time passed too soon.

I was lucky to have a junior and friend like Dwaipayan in the lab who always was there
Special thanks goes to Rajkumarij for his valuable assistance in finishing my experiments. It was only due to his untiring efforts that I was able to complete my experiments on time. He is a big asset to our lab with all his technical expertise.

I will always miss the company of Kailash for more than one reason. He taught me the basics of yeast genetics and stay with him was quite memorable. I am highly and specially thankful to my batchmates Vishal, Naresh, Radha, Souvik, Vibha, Pooja, Jayeeta, Purva and Rachna for their love, affection and co-operation during my stay in IMTECH.

I will always cherish my stay at IMTECH as many new faces became a part and parcel of my life. Where emotions are involved, words cease to mean. Friendship got a new meaning in the company of Kislav, Gautam, Sankar and Vishal. I shall never forget their shelter over me, their patience to listen to me, helpful suggestions and their endless love for me. When each of them left one by one, I felt a void in my life and thought nobody would be able to fill it. IMTECH would never be the same, but wo kehte hai na

"Mohabbat kerne wale kam na honge lekin teri mehfil me hum na honge"

Then came Vibhu, Rohan, Sudipto and life took off again. They were and will always be like my younger brothers, and life was full of beans in their company.

It would not have been possible for me to submit my thesis, had it not been for the efforts of Vibhu. He worked day night with me to wind it off on time.

I am thankful for all the love and affection I received from Ajeet, Arshad, Shubbir, Sanjeev, Mandeep, Narendra, Murthy, Rahul, Swati, Amit Sharma, Sumit, Sharan, Nandini, Anita, Vijaya, Loveena, Arvind and Mitesh.

I am highly thankful to Saumya Da, Mayil Raj Sir and Rajamohan Sir for providing me great company, support and help throughout the whole tenure of my stay.

I am thankful for MITCC staff for providing me liquid Nitrogen, whenever I needed it most.

Staffs of the IMTECH Library, BIC, Administration, Instrumentation and Stores are duly acknowledged for their timely help.

I humbly dedicate this thesis to my father and mother for their constant encouragement, infinite love, inspiration, insights and patience despite their ill health. No words can express my deep sense of gratitude and indebtedness for them.

Shipra is the most beautiful thing to happen in my life and will always remain to be. When she is there with me there is nothing more to ask for!

The fellowship provided by CSIR during my PhD tenure is also acknowledged.
