

“A journey is best measured in friends rather than miles”

Tim Cahill

Acknowledgments - A word of Thanks!

During these few years of my PhD degree, I met many people who became friends, peers and colleagues. These were the few people who encouraged and supported me and this is the time when I would like to thank them.

Firstly, I would like to thank Prof. R. K Shivpuri for his undying support and excellent guidance during the last few years. His office doors were always opened when I needed to discuss anything (physics or something vaguely related to physics) with him. I can never forget the interesting discussions with him. I adore his dedication, discipline and friendly nature with students. Secondly, I would like to thank my supervisor Dr. Kirti Ranjan. He introduced me to the world of experimental particle physics and gave me an excellent opportunity to work at one of the premier research laboratory in the world. I was greatly impressed by his deep understanding of the subject. His enthusiasm and encouragement have made my research years enjoyable and rewarding. I consider myself fortunate to have him as my supervisor.

Working in a huge collaboration like DØ is an experience in itself. During my stay at FermiLab, I met so many wonderful people, scientist, great minds from different parts of the world. I want to express my gratitude particularly to Bjoern, Tammy, Kostas, Davide, Michelle, Mandy, Maiko, Jonas, Jyoti, Joe, Carrie, Jesus, Yunhe and Betty for their continuous friendship and support. I am very thankful to my calorimeter operations colleagues Dean, Walter, Sasha, Selcuk. They helped me to get acquainted with the calorimeter system and it's operations. I would also like to thank the DØ run coordinators Bill Lee, George Ginther and Stefan Gurnehdahl for their cooperation in efficient running of the calorimeter. I am also grateful to the Higgs conveners Aurelio Juste and Wade Fisher for their constant support and encouragement towards my work in the Higgs group. I am also grateful to Dr. Ashish Kumar and Dr. Md. Naimuddin for their helpful guidance during my stay at FermiLab.

Special thanks to the members of our center (CDRST) at Delhi consisting of Sushil Singh Chauhan, Pooja Gupta, Abhinav Dubey, Sudha Ahuja, Shilpee Jain, Sandhya Jain, Pooja Saxena, Arun Saini, Arun Mittal, Shivali Malhotra, Ajay Kumar, Varun Sharma, Daljeet Kaur, Rocky Bala and Ranjeet Dalal. This work would not have been accomplished without the open and friendly working atmosphere in the lab. I also appreciate the time I spent with a very dear friend Arun Saini at Delhi and at FermiLab.

I would also like to thank Council of Scientific and Industrial Research (CSIR), Govt. of India for the financial support. Thanks also to Universities Research Association (Fermilab) for their support during my stay at Fermilab.

And finally, I would like to thank my family (my parents, my parent in-laws, grandparents and siblings) for their unconditional love and support at each step. I consider myself very fortunate to be born in such a loving and caring family. And of course my dear husband, how can I ever thank you enough for you love and support during some of the very tough moments of my Ph.D life. My wonderful little sisters Shruti, Neha, Aprajita and my baby

brother Akhil, thank you so much for your love and appreciation. Last but not the least, I would like to thank the most special person in my life, my baby Ayyan. Thanks for being so helpful even before you were born and thanks for behaving well while I was writing my thesis. You all believed that I will come out as a shining star and while I am writing this last chapter of my thesis today, I think I did!
