ACKNOWLEDGEMENT

At the foremost, I thank the Lord Almighty, who has provided me the ability, the resources, the opportunity and His kind support.

I express my deep gratitude to my supervisor Dr. V. Mohan, whose enthusiasm; encouragement and wisdom have been invaluable to me. He has not only guided me in each and every crucial step of this research work, but also encouraged, supported and helped me. His valuable suggestions, timely advices and continuous support motivated me a lot in successfully completing this research work.

I am grateful to Mr. Karumuthu T. Kannan, Correspondent, Thiagarajar College of Engineering for helping me to do my research work by providing all the facilities. I express my gratitude to Dr. V. Abhaikumar, Principal, Thiagarajar College of Engineering for his advices and constant encouragements, to carry out this research work in a systematic way.

I would like to thank Dr. R. Rajaram, whose dedication and hard work indirectly motivated me in doing my research work. His encouragement and personal advices have encouraged me whenever I feel exhausted.

I would like to thank Dr. Lori A. Clarke, a visiting professor from the University of Massachusetts, in the Indo-US Collaboration workshop, for her invaluable suggestions in transforming my fluid ideas into well defined tasks.

My special thanks to my family members who significantly contributed in my upbringing and brought me to a stage where I can make my humble contributions to human knowledge.

D. JEYA MALA
