ACKNOWLEDGEMENTS

I am indebted to owe my gratitude to Almighty who provided me opportunity of exploring texture of His natural beauties at the molecular level. This is a hard job to include the names of all persons who have involved directly or indirectly in the accomplishment of this work. However, I am very grateful to all my teachers since my school days. I think without being trained enough, I would have not able to enter into the area of investigation of natural laws.

I owe a deep depth of gratitude to my ingenious, martinet and a nonpareil supervisors Dr A S Shawl, Head, Indian Institute of Integrative Medicine (CSIR), Srinagar and Dr M A Khuroo, Reader, Department of Chemistry, University of Kashmir. I owe the greatest depth of gratitude to their invaluable guidance, strong motivation, encouragement and support. The intensive training that I have imbibed during my Ph D would be substantially beneficial for my carrier. The way shown by Dr M A Khuroo has been shaped, built in a right way; given me a life built confidence and lifted my spirits by Dr A S Shawl which cannot be described in words.

I would like to express my deepest appreciation to my father M R Tantray for his guidance, support, constant care and encouragement during the course of my work. Without his involvement it would have been uphill task for me. Words are inadequate to convey my sincere gratitude to my mother, Shameema, brother, Gowher and sister, Humara for their persistent patience, incessant endearment, instigation and invaluable encouragement throughout my research endeavors.
