ACKNOWLEDGEMENT

Pursuing a Dissertation project is a both afflictive and gratifying experience. It is just like climbing a high peak, step by step, accompanied with acrimony, asperities, frustration, encouragement and trust and with so many people’s kind help. When I found myself at the top enjoying beautiful scenery, I realized that it was, in fact, teamwork that got me there. Though it will not be enough to express my gratitude in words to all those people who help me, I would still like to give my many, many thanks to all those people. Words are always poor approximation of what one intends to say. This is a great opportunity on my part to express my gratitude and sincere respects to my research guide Prof. (Dr.) D. D. Santani, Prof. & Director, PG Education and Research, Rofel, G. M. Bilakhia College of Pharmacy, Vapi for his valuable guidance of this exhaustive treatise, which has help me to make my journey from the trepidation to joyful exercise of mind. His constant surveillance, immense encouragement and interminable support have made this thesis a success.

I express my gratitude to Prof. Dinesh R. Shah, Principal, Maliba Pharmacy College, Tarsadi for providing necessary facilities for the completion of this project work.

I owe sincere gratitude and indebtedness to Prof. (Dr.) Shailesh A. Shah, Head PG Department, Maliba Pharmacy College, Tarsadi for his guidance, appreciation and encouragement during the course of study.

With reverence and gratitude, I would like to thank Dr. M. B. Shah, Dept. of Pharmcognosy, L. M. College of Pharmacy, Ahmedabad for her guidance during the course of study.

I express my gratitude to Prof. P. G. Yeole, Principal, IPER, Wardha for providing necessary facilities for carrying out HPTLC and IR spectroscopy of plant material.
I acknowledge with thanks, the valuable suggestions, criticism and cooperation from colleagues. I appreciate and express sincere thanks to Shrikant V. Joshi and Furqan Maulvi for their technical support during thesis writing.

For construction of any strong building, we need a strong foundation that is why I would like to owe my heartiest thanks to my wife RUCHI, who has provided a strong support always in any situation. HER valuable suggestions helped me lot to face the difficult situations. Without her constant encouragement, care, peripheral positive attitude and ceaseless patience, it was quite difficult to complete my research work.

The words at my command are inadequate both in form and spirit to express my deep felt appreciation and sincerity towards my family members for their forbearance of my long absence which come in the wake of long hours of working on research. They patiently provided all the support whenever I resurfaced in need of renewal and encouragement.

It is my duty to express tearful acknowledgement to animals who sacrificed there lives for benefit of human beings.
