ACKNOWLEDGEMENTS

As I complete this thesis, I can admit with equanimity that the present work has acquired this form due to support, guidance and suggestions from many people. It will be unjustified to take the whole credit of the work without mentioning the name of the persons whose hands are behind the curtain. At this juncture, I take this opportunity to thank each one of them for their contribution.

First and foremost I owe Dr. C. K. Ashok Kumar, a great debt of gratitude for guiding me through this project right from its inception to its successful completion. I will always be grateful for his unstinting support, invaluable suggestions and critical evaluation.

I wish to tender sincere thanks to Dr. G. Krishna Mohan, Professor and Head, Centre of Pharmaceutical Sciences, Jawaharlal Nehru Technological University Hyderabad for his valuable suggestions during the progress of my work.

I would be thankful to Dr. K. Lal Kishore, Director, Research and Development Cell, Jawaharlal Nehru Technological University Hyderabad for his constant support during my Ph.D. tenure.

I gratefully acknowledge my respected seniors Dr. Preeti Venugopalan, Reader, University Institute of Pharmacy, Ravishankar Shukla University, Chattisgarh, India and Dr. Ashuthosh Mishra, Principal, Acharya Narendradev College of Pharmacy, Uttar Pradesh, India for their constant encouragement and pragmatic suggestions at times of difficulty, which enabled me in bringing this thesis to the present form.

I wish to place on record my sincere thanks to the Manager, Zydus Research Laboratory, Baroda and Alkem Laboratories, Mumbai
for providing the gift samples of Aceclofenac, Mefenamic Acid and Dexibuprofen.

I immensely thank the Scientists of Indian Institute of Chemical Biology, Kolkata for their generosity in performing spectral studies and interpretation of drug molecules. I am deeply indebted to the Department of Pathology, Sri Venkateswara Veterinary University, Tirupati for their timely help in completing the histopathological studies.

I take this opportunity to express my sincere thanks to Padmasree Dr. M. Mohan Babu, Chairman, Sree Vidyanikethan College of Pharmacy for providing infrastructural facilities to carry out this work.

It would be remiss if not acknowledging the great support I received from all my colleagues in Sree Vidyanikethan College of Pharmacy, Tirupati, Andhra Pradesh at every conceivable level. I express my deepest gratitude to Dr. S. Mohanalakshmi, Dr. M. Sevukarajan, Mr. Rahul Nair, Mr. Rajesh Kaza and Mr. Venkama Raju for their concern and understanding. I am deeply indebted to Mr. A. Saravana Kumar for helping me in performing the pharmacological experiments and Mr. T. Sunil Kumar Reddy for his extended help. I also thank Mr. M. Mohan Kumar and Mrs. P. Obulamma for their assistance in completing the laboratory works.

I express my sincere and deep sense of gratitude to my beloved friends and seniors Mr. M. Purushothaman, Mr. E. N. Madhu, Dr. R. S. K. Vijayan, Dr. V. Ravichandran, Dr. S. Sudheesh, Dr. N. Venkatesan, Mr. G. Dileep, Dr. D. Sampath Kumar, Dr. Umesh K. Patil, Mr. N. Janardhanan, Ms. I. Theja, Dr. Peter Alexander, and Mrs. M. Sabitha for their kind cooperation, encouragement and moral support throughout my research work.
I am highly obliged to the National Medical Library, New Delhi; National Institute of Immunology, New Delhi; CDRI, Lucknow; IICB, Kolkata; IICT, Hyderabad; Sri Venkateswara University, Tirupati for providing the valuable literature concerning my work. I acknowledge the unknown reviewers of various reputed journals who helped me through their critical reviews and suggestions in improving my research.

I find myself groping for appropriate words to thank my Parents, brother Kiron and family for all they have been and done for me. I gratefully acknowledge my parent in laws, sister in laws and family for their constant support and blessings. They always have helped me to find a purpose, direction and goal in my life. I owe my heartfelt gratitude to my wife Jasmin who showered love and moral support. Without her understanding and encouragement, it would have been impossible for me to finish this work. At this juncture, I cannot forget my sweet little son Aarush for his love and affection towards me. It was the dreams that my family wove around me that gave me the strength to face the challenges of life.

I am thankful to the authorities of Jawaharlal Nehru Technological University Hyderabad for providing me the facilities to complete my research work successfully.

Finally, I thank all those whom I could not acknowledge, either inadvertently or due to lack of space. In the end, I bow to the almighty for making everything worthwhile.

ARUN RASHEED
