ACKNOWLEDGEMENT

It is with great pleasure that the author expresses his indebtedness to Dr. T.V.V.G.R.K. Murty, Reader, Centre of Advanced Study in Geology, University of Saugar, for his guidance, encouragement, criticism, and for careful reading of the manuscript. Grateful thanks are due to Prof. W.D. West, Director, Centre of Advanced Study in Geology, for offering an opportunity to work in the Centre and for his keen interest and encouragement. The author is particularly grateful to him for taking the photomicrographs.

The author is greatly indebted to his teacher Shri G.V. Damle, Head of the Department of Geology, Udaipur University, for his invaluable help and guidance, specially in the sedimentation part of the thesis. Thanks are also due to Prof. M.W. Chaudhari, Head of the Department of Geology, University of Rajasthan, for the library and section cutting facilities.

The author expresses his sincere thanks to Dr. M.R.W. Johnson of Edinburgh University (U.K.), for his suggestions in the field when he was at the Centre as a Visiting Professor and for the consultations the author had with him through correspondence.

Thanks are due to Shri M.B. Patel, and Dr. V.K. Nayak, Research Associate in the Centre of Advanced Study in Geology, for their kind help during the author's stay at Sagar and to Dr. S. Laxmanan, for his meticulous reading of the manuscript.

The work could be brought to its present form through the constant help and encouragement, the author received from his wife Jaya.
Finally, the author wishes to record his gratitude to the University of Rajasthan for granting him study leave for two years.

B. L. Sharma
