ACKNOWLEDGEMENT

With much pleasure I offer my sincere thanks and deep sense of gratitude to my respected guide and research supervisor Dr. P. L. Sharma, Professor and Head, Department of Mathematics and Statistics, Dr. H. S. Gour Vishwavidyalaya, Sagar for his valuable precious guidance substantive comments dynamic suggestions and careful evaluation in this endeavour of mine.

I will always be remembering my beloved sister Ku. Pratima Rawat a co-associate in the department and research scholar for her constant inspiration and encouragement.

My parents made my rough journey from the rustic environment of a remote village to the company of elite in metropolitan cities enjoyable by creating the happiness of heaven at home. Paying of gratitude will be rather too meagre to their status and emotions which in no way can be reckoned in words.

During the course of conducting my research work Sarva Shri Fisher, B., Rhoades, B.E., Iseki, K., Park, S., Sessa, S., Stojakovic, M. and Singh, S.L., helped by availing their work and all the requisite material. I am therefore highly indebted to their such generous contribution.

For financial help I extend my heartfelt sincere obligations to M.P. Govt. for availing state merit scholarship and
to my brother Shri Girish Bohare who contributed since the very beginning of my studies very liberally.

Chapter IV, V, VI and VII embodied in the present work have been accepted for publication in different Mathematical Journals.

Before I end I must offer my gratitude to Shri Yogendra and Devendra Agarwal (Neeta Typing Centre) for their co-operation and help rendered by typing the mathematical matter an irksome job done so nicely.

Deptt. of Mathematics & Statistics
Dr. Hari Singh Gour Vishwavidyalaya,
SAGAR (M.P.) INDIA.

(Arvind Bohare)
