LIST OF TABLES

Table 4.1: Mean, Standard Deviation and Independent Samples ‘t’ test in the pre-test of experimental and control groups on examination performance score.

Table 4.2: Mean, Standard Deviation and Independent Samples ‘t’ test in the pre-test of experimental and control groups on individual spheres and total study habit scores.

Table 4.3: Mean, Standard Deviation and Independent Samples ‘t’ test in the pre-test of experimental and control groups on educational aspiration.

Table 4.4: Mean, Standard Deviation and Independent Samples ‘t’ test in the Pre-test of experimental and control groups on adjustment scores.

Table 4.5: Mean pre and post test scores of boys and girls in experimental and control groups on examination performance.

Table 4.6: Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of boys and girls in experimental
and control groups on examination performance.

**Table 4.7:** Mean, Standard Deviation, pre and post test scores of students studying in mountain, valley, hill and plain sector’s schools in experimental and control groups on examination performance.

**Table 4.8:** Results of Repeated Measure ANOVA- within and between subjects’ effects for mean pre and post test scores of mountain, valley, hill and plain sector’s schools in experimental, control groups on examination performance score.

**Table 4.9:** Mean, Standard Deviation, pre and post test scores of private and government schools in experimental and control groups on examination performance.

**Table 4.10:** Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of private and government schools in experimental and control groups on examination performance.

**Table 4.11:** Mean, Standard Deviation, pre and post test scores of boys and girls in experimental and control groups on total study habits.
Table 4.12: Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of boys and girls in experimental and control groups on study habits.

Table 4.13: Mean, Standard Deviation, pre and post test scores of mountain, valley, hill and plain sector’s schools in experimental and control groups on study habits.

Table 4.14: Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of mountain, valley, hill and plain sector’s schools in experimental, control groups on study habits.

Table 4.15: Mean, Standard Deviation, pre and post test scores of students studying in private and government schools in experimental and control groups on total study habits.

Table 4.16: Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of private and government schools in experimental and control groups on study habits.

Table 4.17: Mean, Standard Deviation, pre and post test scores
of boys and girls in experimental and control groups on adjustment.

Table 4.18: Results of Repeated Measure ANOVA- within and 
between subjects’ effects for Mean pre and post test scores of boys 
and girls in experimental and control groups on Adjustment.

Table 4.19: Mean, Standard Deviation, pre and post test scores of 
mountain, valley, hill and plain sector’s schools in experimental 
and control groups on adjustment.

Table 4.20: Results of Repeated Measure ANOVA- within and 
between subjects’ effects for mean pre and post test scores of 
mountain, valley, hill and plain sector’s schools in experimental 
and control groups on adjustment.

Table 4.21: Mean, Standard Deviation, pre and post test scores of 
private and government schools in experimental and control groups 
on adjustment.

Table 4.22: Results of Repeated Measure ANOVA- within and 
between subjects’ effects for Mean pre and post test scores of 
private and government schools in experimental and control 
groups on adjustment.
**Table 4.23:** Mean, Standard Deviation, pre and post test scores of boys and girls in experimental and control groups on educational aspiration.

**Table 4.24:** Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of boys and girls in experimental and control groups on educational aspiration.

**Table 4.25:** Mean, Standard Deviation, pre and post test scores of mountain, valley, hill and plain sector’s in experimental and control groups on educational aspiration.

**Table 4.26:** Results of Repeated Measure ANOVA- within and between subjects’ effects for Mean pre and post test scores of mountain, valley, hill and plain sector’s schools in experimental, control groups on educational aspiration.

**Table 4.27:** Mean, Standard Deviation, pre and post test scores of private and government schools in experimental and control groups on educational aspiration.

**Table 4.28:** Results of Repeated Measure ANOVA- within and
between subjects’ effects for Mean pre and post test scores
of private and government schools in experimental and control
groups on educational aspiration.
