List of Tables

Table 1: Proximate composition % of dietary ingredients
Table 2: Composition of dietary ingredients
Table 3: Composition of dietary ingredients
Table 4: Composition of dietary ingredients
Table 5: Probiotic properties of *B. coagulans* using different testing methods: Zone of inhibition and hydrophobicity
Table 6: Proximate composition (% dry weight basis) of experimental diets
Table 7: Growth performances and intestinal enzyme activities of *Catla catla* fed on Soybean based diets containing varying proportions of probiotic bacterium *B. coagulans*
Table 8: Proximate carcass composition of *Catla catla* fed on Soybean based diets containing varying proportions of probiotics bacterium *B. coagulans*
Table 9: Effect of fish fed on soybean based diets with different proportion of probiotic bacterium *Bacillus coagulans* supplementation on water quality characteristics
Table 10: Hematological Values of *Catla catla* fed on Soybean based diets containing varying proportions of probiotics bacterium *B. coagulans*
Table 11: Effect of *Bacillus coagulans* and their interaction on Phagocytic ratio and Phagocytic index of *Catla catla*
Table 12: Nitro Blue Tetrazolium (NBT) activity of *Catla catla* fed on diet containing various proportions of probiotic bacterium *Bacillus coagulans*
Table 13: Per cent mortality and Relative Percent Survival (RPS) of *Catla catla* in a challenge trial with *Aeromonas hydrophila* for 10 days
Table 14: Proximate composition (% dry weight basis) of experimental diet
Table 15: Growth performances and intestinal enzyme activities of *Catla catla* fed on diets varying proportions Duckweed based diets
Table 16: Proximate carcass composition of *Catla catla* fed on diets containing varying proportion of soybean replaced with duckweed
Table 17: Effect of fish fed with different proportion soybean replaced with duckweed based diets on water quality characteristics
Table 18: Cost–benefit analysis of fish fed different levels of diets containing varying proportion of soybean replaced with duckweed
Table 19: Proximate composition (% dry weight basis) of experimental diet
Table 20: Growth performances and intestinal enzyme activities of *Catla catla* fed on diets with varying proportions of *Bacillus coagulans* in Duckweed based diets
Table 21: Proximate carcass composition of *Catla catla* fed on duckweed based diets containing varying proportions of *Bacillus coagulans* as probiotics

Table 22: Effect of fish fed on Duckweed based diets with different proportion of probiotic bacterium *Bacillus coagulans* supplementation on water quality characteristics

Table 23: Hematological Values of *Catla catla* fed on diets with Duckweed and varying proportions of *B. coagulans* after feeding trial

Table 24: Effect of *Bacillus coagulans* and their interaction on Phagocytic ratio, Phagocytic index of *Catla catla*
