ACKNOWLEDGEMENTS

Rest not. Life is sweeping by; go and dare before you die.
Something mighty and sublime, leave behind to conquer time.
Johann W V Goethe

I wish to thank our late Hakim Abdul Hameed Sahib, the founder of this university as he was and always be, the source of inspiration not to me alone but to many.

I express my profound sense of gratitude towards my teacher, preacher and supervisor, Dr Altuf Ahmad, for his intellectual guidance and incessant encouragement. He has been a true personification of affection, dedication, devotion, compassion and diligence upholding the finest tradition of an ideal guide. His scholarly suggestions, immense interest, affectionate behaviour and advises helped me in moulding my research work in the form of this thesis.

My whole-hearted thanks go to my co-supervisor, Professor Muhammad Iqbal, for all his support, care, suggestion and expert evaluation. It is a privilege to be a student of him. His dynamic nature, constant support, scientific suggestions brought my research work to its logical conclusion.

I am grateful to Professor Javed Ahmad, Head, Department of Botany for his graciousness. His suggestion, sustained encouragement and guidance has always been a great help.

It is my immense pleasure to acknowledge the support and encouragement of Professor P.S. Srivastava, Dean, Faculty of Science.

Much is owned to all my teachers Prof. M. P. Sharma, Dr T. O. Siddiqui, Dr. Shahid Umar, Dr. Mahmooduzzaffar and Dr. Abdul Mujib. Their moral support and valuable guidance is beyond words.

My special thanks are due to loving Dr. (Mrs) Ishrat Khan for being so helping and caring. I am indebted to her for all the support she provided when I was in real need of a helping hand. She is one of the most caring person I have ever met. I must acknowledge dearest Dr. Anjum Arshi for helping me selflessly. My research work would have not been completed without her immense help. She was always there for me whenever I needed her. The word ‘help’ is very small and becomes meaningless when it comes to describing what all she has done for me.

I whole heartedly put on record the appreciation that will be reserved for my colleagues Kafeel, Hema, Ruqaya, Faheema, Ruby, Khalid, Saima, Asha, Lata, Anis, Aradhana and Mohsin for their support and encouragement at various stages of my research work. Their thoughts and ideas helped me a lot in overcoming my difficulties during my last phase of work.

I am thankful to Dr. S.D. Sharma and Mr. Irshad for helping me to carry out the experimental work in CIF. A word of appreciation goes to Mr. Hafeezuddin and Mr. Zakir for their cooperation. Hafeezuddin Sir, has always showered his blessings and affection on me. I appreciate the assistance and painstaking help rendered by Mr. Abdul Kareem, Mr. Idrees, Mr.
