

LIST OF FIGURES

Figure No	Figure caption	Page No
2.1	A list of biological oscillators involved in voice production and factors that may influence them.	12
2.2	Schematic diagram of the vocal system	13
2.3	Schematized diagram of the vocal apparatus	15
3.1	Spectrum of a TE voice	31
3.2	The lower trace showing an arbitrary harmonic voice spectrum	32
3.3	Definition of zero-crossings rate	40
3.4	Distribution of zero-crossings for unvoiced and voiced speech	40
3.5	Calculation of correlation dimension for Lorenz equation	58
3.6	Calculation of Kolmogorov entropy	61
3.7	Variation of PE for regular and random signal. (a) sine wave (b) random signal (c) PE for sine wave (d) PE for random signal	69
3.8	Variation of PE for regular signal connected to random signal (a) sine wave connected to random signal (b) PE for sine wave connected to random signal	70
3.9	Logistic equation for varying control parameter 'r' (a) Bifurcation diagram (b) Variation of PE	71
4.1	(a) Represents the audio file of a normal subject uttering a sentence (b) Represents the PE of a same normal subject uttering a sentence	114

4.2	(a) Represents the audio file of a stuttering subject uttering a sentence	115
	(b) Represents the PE of a same stuttering subject uttering a sentence	
4.3	(a) Represents the audio signal for the stuttering subjects after therapy	115
	(b) Represents the PE values for the same stuttering subject after therapy	
4.4.	Evolution of PE of speech signals of 10 Normal and 10 stuttering subjects.	117
4.5	PE calculated for first 10 Person With Stammering subjects(1-10) and normal subjects(11-20) for Vowel / <u>æ</u> /.	118
4.6	PE calculated for first 10 PWS subjects(1-10) and normal subjects(11-20) for Vowel / <u>ɛ</u> /	119
4.7	PE calculated for first 10 PWS subjects(1-10) and normal subjects(11-20) for Vowel / <u>ɜ</u> /.	119
4.8	Variation of average phonation number with respect to sound intensity for PWS and Fluent Subjects	120
4.9	PE calculated for stuttering subjects before treatment and after 2 weeks speech therapy	121
4.10	PE calculated for first 10 PWS subjects(1-10) and normal subjects(11-20) for a sentence	122
5.1	Variation of PE for vowel / <u>æ</u> / for normal and pathological subjects	141
5.2	Variation of PE for vowel / <u>ɛ</u> / for normal and pathological subjects	143
5.3	Variation of PE for vowel / <u>ɜ</u> / for normal and pathological subjects	144
5.4	PE calculated for first 10 abnormal subjects and normal subjects for vowel / <u>æ</u> /	146

5.5	PE calculated for first 10 abnormal subjects and normal subjects for vowel / <u>æ</u> /	146
5.6	PE calculated for first 10 abnormal subjects and normal subjects for vowel / <u>ə</u> /	147

LIST OF TABLES

Table No	Table caption	Page No
3.1	Comparison of linear and nonlinear signal processing techniques	47
4.4a	Nonlinear parameters for vowel / a / for normal subjects.	91
4.4b	Nonlinear parameters for vowel / a / before therapy for stuttering subjects.	92
4.5a	Nonlinear parameters for vowel / e / for normal subjects.	93
4.5b	Nonlinear parameters for vowel / e / before therapy for stuttering subjects.	94
4.6a	Nonlinear parameters for vowel / u / for normal subjects.	94
4.6b	Nonlinear parameters for vowel / u / before therapy for stuttering subjects.	95
4.1a	Linear parameters zero crossing rate, Fundamental Frequency , jitter and shimmer for evaluating acoustic properties for signal (vowel / a /) of normal subjects	96
4.1b	Linear parameters zero crossing rate, Fundamental Frequency, jitter and shimmer for evaluating acoustic properties for signal (vowel / a /) of stuttering subjects	96
4.2a	Linear parameters zero crossing rate, Fundamental Frequency, jitter and shimmer for evaluating acoustic properties for signal (vowel / e /) of normal subjects	97
4.2b	Linear parameters zero crossing rate, Fundamental Frequency, jitter and shimmer for evaluating acoustic properties for signal (vowel / e /) of stuttering subjects	97
4.3a	Linear parameters zero crossing rate, Fundamental Frequency, jitter and shimmer for evaluating acoustic properties for signal (vowel / u /) of normal subjects	98

4.3b	Linear parameters zero crossing rate, Fundamental Frequency, jitter and shimmer for evaluating acoustic properties for signal (vowel / <u>ə</u> /) of stuttering subjects	98
4.7	Nonlinear parameters for vowel “ <u>ə</u> ” after two weeks speech therapy for stuttering	101
4.8	Nonlinear parameters for vowel “ <u>ə</u> ” after two weeks speech therapy for stuttering	101
4.9	Nonlinear parameters for vowel “ <u>ə</u> ” after two weeks speech therapy for stuttering	102
4.10	Linear parameters zero crossing rate, Fundamental Frequency , jitter and shimmer for evaluating acoustic properties for signal (vowel / <u>ə</u> /) after 2 weeks therapy for stuttering	104
4.11	Linear parameters zero crossing rate, Fundamental Frequency , jitter and shimmer for evaluating acoustic properties for signal (vowel / <u>ə</u> /) after 2 weeks therapy for stuttering	104
4.12	Linear parameters zero crossing rate, Fundamental Frequency , jitter and shimmer for evaluating acoustic properties for signal (vowel / <u>ə</u> /) after 2 weeks therapy for stuttering	105
4.16	Average value of nonlinear parameters calculated for a sentence of normal subjects	107
4..17	Nonlinear parameters for stuttering subjects calculated before therapy for sentence	107
4.18	Nonlinear parameters for stuttering subjects calculated after therapy for sentence	108
4.13	Average value of linear parameters calculated for a sentence for normal subjects	109
4.14	Average value of linear parameters calculated for a sentence before speech therapy	109
4.15	Average value of linear parameters calculated for a sentence after two weeks speech therapy	110
5.1a	Linear acoustic parameters evaluated for vowel / <u>ə</u> / for normal subjects.	133

5.1b	Linear acoustic parameters evaluated for vowel / <u>æ</u> / for abnormal subjects.	133
5.2a	Linear acoustic parameters evaluated for vowel / <u>ɛ</u> / for normal subjects	134
5.2b	Linear acoustic parameters evaluated for vowel / <u>ɛ</u> / for abnormal subjects	134
5.3a	Linear acoustic parameters evaluated for vowel / <u>ɔ</u> / for normal subjects	135
5.3b	Linear acoustic parameters evaluated for vowel / <u>ɔ</u> / for abnormal subjects	135
5.4a	Nonlinear parameters evaluated for vowel / <u>æ</u> / for normal subjects	137
5.4b	Nonlinear parameters evaluated for vowel / <u>æ</u> / for abnormal subjects	138
5.5a	Nonlinear parameters evaluated for vowel / <u>ɛ</u> / for normal subjects	138
5.5b	Nonlinear parameters evaluated for vowel / <u>ɛ</u> / for abnormal subjects	139
5.6a	Nonlinear parameters evaluated for vowel / <u>ɔ</u> / for normal subjects	139
5.6b	Nonlinear parameters evaluated for vowel / <u>ɔ</u> / for abnormal subjects	140
5.7	Mean and standard deviation of PE for vowel / <u>æ</u> /	142
5.8	Mean and standard deviation of PE for vowel / <u>ɛ</u> /	144
5.9	Mean and standard deviation of PE for vowel / <u>ɔ</u> /	145
