ACKNOWLEDGEMENT

At the very beginning, I convey my most earnest gratitude to the supernatural power “Almighty God”. Without the mercy of supreme power of the world, I am damn sure I was unable to complete this research work. In fact not only research work but also each and every field of my life was incomplete without his blessings and I would have failed in the proper completion of work without his assistance. My most earnest gratitude towards almighty would be untrue if I don’t express my gratefulness toward my parents, my Father Shri Krishan Baldev Sharma a true gentleman and My mother Smt. Aruna Sharma a true gentle lady, whose blessings, total support and love enabled me to achieve higher scholarly goals. It was my parents deep desire that I should achieve this extreme title in front of my name. My parents humbleness, enthusiasm, blessings, truthfulness and disciplined life enlightened my way toward the my goals. I am indebted to a lot many people directly or indirectly for their assistance to complete this research work but a few names must represent many.

I am thankful to Shri Vinod Tibrewala Chancellor, Dr. Vice chancellor, Shri Balkishan Tibrewala (C.E.O., J.J.T), Dr. Rajendra Choudhary Coordinator Education Department, for their cooperation and timely help. I am also thankful to the staff of University for their timely help and cooperation.

I am thankful to my guide Dr. Mohan Singh Shekhawat for his precious commitment, supervision, which he gave all the way through for writing of this thesis. His experience and motivation stimulated my mind and made me work harder and harder for this research.

If I don’t mention my sister Arti Sharma name in this I would be cheating myself as she was a great support during this research work and provided me all the material required to complete my work from all sides where I was failing to collect it. She was more curious than me about my work and her regular consideration about it made me complete this research in time.
I am indebted to her for her real warmth and true love for me during the
days of my research.

My dearest son Tejas Vardhan Sharma’s sacrifices are incredibly
complex to acknowledge as he was deprived of all motherly comforts and
still he rendered a great support in concretizing my work. Even after
toiling for his day to day work he was so calm that he always kept smiling
and his smiling face kept me going all the way long. A special gratitude to
my elder brother Manish Sharma and sister-in-law Meenakshi and my
nephew Yash Vardhan Sharma for their deep consideration and affection
which infused energy inside me during the time of my research.

I would unquestionably falling in my duties if I forget the man behind my
achievements Shri Umesh Kumar Khaitan, in this academic quest he
has been a strength to me and supported me in all the circumstances. I
found him standing beside me with his calmness, assistance and
inspiration whenever I was trying to give up.

I express my sincere thanks to Dr. Snehlata Shekhawat as her
experience and affection was also a source of motivation to me. I would
like to thank all the students of the secondary schools of shekhawati
region who acted as subject for present study and all the principals and
teachers are also respectful to me for allowing me to collect data from their
schools. I can never forget the help done by dear Ravikant Sharma, Ravi
Shankar Sharma and all the children and staff of Shri Chavo Dadi
Vidya Kunj Sec. School, Jhunjhunu where I am working as Principal,
who inspired me to choose this topic as my research work as schooling is
the foundation of all future studies and this the time when character is
developed. A person of high self esteem will always be an asset in
protecting and developing the nation, society and humanity. In the end, I
would like to show appreciation to all those, who have been a spell of rain
encouragement ever since and directed me with zeal, honest support and
absolute originality genius to commence and complete this study.
