ACKNOWLEDGEMENT

The study of settlement is the most vigorous analysis for “Man environment interaction”. This interaction forms a very complex system. Therefore, study of settlement mostly the study of rural settlement together with its environment become an integral part of that system. In such a system of interaction and changes, many aspects like environmental, economic, demographic, cultural, social as well as technological and several other issues may also be identified. Therefore, in these perspectives, the present work attempts towards the formulation of detailed morphological study of rural settlement in descriptive form, so that the settlers, planners as well as those who are interested in this field may stimulate the appraisal of resource mobilisation and socio-economic planning for the betterment of rural settlement and its habitat system in the state.

I do regret to be unable to mention the latest census records of 2001 as the period of present research work happens in the transitional period of two censuses 1991 and 2001. Thus in the present work many of the information are based on 1991 census while records of 2001 in some areas.

It is really a great pleasure to express my deep sense of gratitude to my respected supervisor Dr. M. Balaram Singh, Principal, Y.K. College, Wangjing, for his generous guidance, valuable suggestions and constant encouragements through the research work. I owe a great sense of obligation for his supervision without which this work would not have been completed in time.

I express my thankfulness to P. Ibetombi Devi, Principal Kakching Khunou College for giving me the chance for completion of my research work. It is also a privilege to thank all the faculty members, Department of Geography, Kakching Khunou College and entire staff of the College for encouraging me in different directions. My sincere gratitude also goes to Shri Soibam Haridas Singh Lecturer in Geography, Govt. Girls’ Higher Secondary, Silchar for giving me many suggestions and help for the betterment of this research work.
I express my sincere thanks to my friends Shri Haobijam Yaima Singh Sr. Lecturer Department of Geography, Thambal Marik College, Shri Warepam Lukhoi Singh Part Time Lecturer in Geography, C.I. College and Shri S. Kunjadas Singh Asst. Teacher Nungphou High School, Cachar, Assam for their valuable help during the course of many field works. Indeed, without their help this work would not have been completed in time.

I am extremely thankful to the officers and staffs of the Directorate of Settlement and Land Records for providing necessary information and cadastral map, and the Directorate of Census operations, Manipur for excellent co-operation in providing population data used and analysed in the present study.

I am also grateful to Shri W. Tomchou Singh, Retd. Add. Director of Schools Govt. of Manipur, who deserves special acknowledgement for giving me critical comments to improve the quality of this work.

I thank Shri Mutum Ibothoi Singh of M.A. Computer, Thoubal and my brother Shri Longjam Sarat Singh of Printways, Lourembam for their valuable assistance in typing work of the thesis and setting up maps and graphics in computer for quality resolution.

Lastly, I express my sincere thanks to my parents, brothers and also to my beloved wife for rendering help in different academic and domestic fronts.

Dated, Canchipur
the 16th Dec. 2002

Longjam Ibochoubi Singh
