ACKNOWLEDGEMENT

Dr. Hareesh N Ramanathan, my research supervisor, mentor, colleague and a great friend who is the strength of character for me throughout the thesis work. I had joined for Ph. D in the year July 2008 and joined under the supervision of Dr. Hareesh N Ramanathan in the year 2012. I extend my inexplicable gratitude to Dr. Hareesh N Ramanathan for giving me all help in fulfilling this work in the shortest time. Mrs. Preeja. R and her husband Mr. Midhun S.H. have made relentless effort to complete my work. I wish to express my heartiest thanks and gratitude to Prof Dr. V. Job Kuruvilla, Director, Toc H Institute of Science & Technology whose vision had made this institution a research centre of Anna University which enabled me to become a research scholar and for all the support extended to me throughout my career at TIST. Certain people will show the magnanimity of extending a helping hand when we are blocked out of what to do next. I always feel, without the selfless support of our principal Prof Dr. B. Justus Rabi, I will not be in a position to write this acknowledgement. I wholeheartedly owe my sincere thanks and gratitude to him. I will forever be thankful to my former research supervisor, Dr. K. Hariharan. I will never forget the efforts taken by Dr. Sreesha Sasi in collecting data and very patiently helped me in other works in research. Finally I thank Father J. Chandrasekharan Nair and mother Haripriya, and the God Almighty for letting me overcome all the difficulties.

ARUNCHAND C.H.
