An understanding heart is everything in a teacher, and cannot be esteemed highly enough. One looks back with appreciation to the brilliant teachers, but with gratitude to those who touched our human feeling.

Carl Jung (1875 - 1961)

I am deeply indebted to my research guide Dr. Swarnamala Sirsi for her support, encouragement and guidance. I would like to gratefully and sincerely thank her for the understanding, patience, and most importantly, her encouragement to ensure that I complete my Ph.D during my research stint at Yuvaraja’s College, University of Mysore as a research scholar (UGC-FIP). Her mentorship was paramount in providing me with willpower to go for my Ph.D nearly 25 years after my Master’s education. She encouraged me to not only grow as a theoretical physicist but also as an independent thinker. I doubt if many guides allow their research students to contact them all hours of the day and night, the privilege which madam granted me. I appreciate all her contributions of time, ideas, motivation, enthusiasm and immense knowledge to make my Ph.D. experience productive and stimulating. For everything you’ve done for me, madam, I thank you from the bottom of my heart.

I would also like to thank Prof. R. Somashekhar, Department of Studies in Physics, University of Mysore, Mysore for supporting my research by providing unflinching encouragement and support in various ways. His ideas, encouragement and passions in science, exceptionally inspired and enriched my growth as a student and as a researcher. I am indebted to him more than he knows.

Learning computer programming at this stage of my professional life was a challenge which I immensely enjoyed. I must thank Dr. Parameshwara Puttanna, Yuvaraja’s College
for his unstinted help in solving my technical problems however complex it might have ap-
peared to me.

I would like to thank my doctoral thesis committee: Prof. C. Ranganathaiah, Prof. T. K. Umesh, Prof. L. Paramesh and Prof. R. Somashekar for their insightful comments and proper suggestions.

I am very grateful to the past and present Principals of Yuvaraja’s College, University of Mysore, Mysore for the opportunity given and the facilities provided for my research work. I am also grateful to the past and present chairman, Department of Studies in Physics, Manasagangotri, University of Mysore, for the facilities provided for my research work. My sincere thanks to UGC, India for granting me the study leave under Faculty Improvement Programme.

I also thank the management, Principal, St. Joseph’s College, Bengaluru for allowing me to utilize the study leave granted by UGC, India under FIP.

My entire work was made possible due to the warm hospitality of my friend Sumathi and her family. I will always have a warm corner in my heart for them.

I thank Mr. Subramanya Hegde and Ms. Sakineh Ashourisheikhi (Samin) for fruitful discussions. My sincere thanks to Prof. A.R.P Rau, Prof. Sankaranarayanan and Mr. Balakrishnan for helpful academic discussions.

I thank Dr. Uma, Dr. Prabhu, Dr. Balasubramanyam J. Iyer and Mrs. Shilpashree for useful discussions and giving me the moral support. I am indebted to Mr. Siddaraju and other research fellows from the Department of studies in Physics, Manasagangotri, Mysore
for providing stimulating and pleasant environment.

I thank Dr. Usha Devi, Department of Physics, University of Bengaluru for all the official help given.

I thank my father and late mother for their encouraging words throughout my research work. I thank my family people; my husband, daughter, son, brothers and sisters for their constant support.

I thank all the non-teaching staff of Department of Studies in Physics, University of Mysore and also Yuvaraja’s College, University of Mysore, Mysore for the help extended in every stages of this work. Finally, I thank each and every one who directly or indirectly helped me in completing this work.

Veena Adiga
