ACKNOWLEDGEMENT

The author feels privileged to place on record a deep sense of gratitude and indebtedness to his revered teacher and mentor Dr. K.P. Dubey, M.Sc. D.Phil, Head, Department of Chemistry, Kashmir University, Srinagar, for the most kind and valuable guidance and continuous encouragement during the progress of research without which this work would never have come to light.

Particular thanks are due to Prof. R.K. Kapoor, (Delhi University) and Prof. K.N. Munshi (Kanpur University) for arranging the I.R. scanning of solid complexes.

The interest, advice and help rendered from time to time by friends, colleagues and teachers in the Department is gratefully remembered particularly so by Dr. S.P. Beg, and Dr. B.L. Wasir.

The financial support (J.R.F.) granted by the University Grants Commission, New Delhi is gratefully acknowledged.

Grateful thanks are also due to Mr. Mohd. Sidiq Har, for typing this thesis.
The author shall be failing in duty if he does not express his sincerest and most profound thanks to his esteemed parents and particularly his eldest brother (Dr. Dildar Ahmad, Reader, Department of Zoology, Kashmir University) for the unstinted love, affection and necessary impetus to pursue research studies.

(Saleem Iftekhar)
