**LIST OF TABLES INCLUDED**

Table I : Details of the various species of plants surveyed with respect to pest infestation

Table II : List of phytoseiid mites collected from various localities

Table III : Distribution of phytoseiid predators selected for biological studies

Table IV : Percentage consumption of different stages of *A. largoensis* on different stages of *T. neocaledonicus* at a temperature of 30± 2°C and 70 ± 2% RH

Table V : Percentage consumption of different stages of *A. largoensis* on different stages of *T. cinnabarinus* in 24 hour at a temperature of 30± 2°C and 70 ± 2% RH

Table VI : Percentage consumption of different stages of *A. largoensis* on different life stages of *T. fijiensis* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table VII : Percentage consumption of different stages of *A. largoensis* on different stages of *R. indica* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table VIII : Percentage consumption of different stages of *A. largoensis* on different stages of *A. destructor* at a temperature of 30± 2°C and 70 ± 2% RH

Table IX : Percentage consumption of different stages of *A. largoensis* on different stages of *D. minutus* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table X : Percentage consumption of different stages of *T. suknaensis* on different stages of *T. neocaledonicus* in 24 hours at 30± 2°C and 70 ± 2% RH

Table XI : Percentage consumption of different stages of *T. suknaensis* on different stages of *T. cinnabarinus* in 24 hours at 30± 2°C and 70 ± 2% RH

Table XII : Percentage consumption of different stages of *T. suknaensis* on different stages of *T. fijiensis* in 24 hours at 30± 2°C and 70 ± 2% RH

Table XIII : Percentage consumption of different stages of *T. suknaensis* on different stages of *R. indica* in 24 hours at 30± 2°C and
Table XIV: Percentage consumption of different stages of *T. suknaensis* on different stages of *A. destructor* in 24 hours at 30 ± 2°C and 70 ± 2% RH

Table XV: Percentage consumption of different stages of *T. suknaensis* on different stages of *D. minutus* in 24 hours at 30 ± 2°C and 70 ± 2% RH

Table XVI: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *T. neocaledonicus* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XVII: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *T. cinnabarinus* in 24 hours at 30 ± 2°C and 70 ± 2% RH

Table XVIII: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *T. fijiensis* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XIX: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *T. cinnabarinus* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XX: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *A. destructor* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXI: Percentage consumption of different stages of *A. guptai* sp. nov. on different stages of *D. minutus* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXII: Percentage consumption of different stages of *P. multidentatus* on different stages of *T. neocaledonicus* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXIII: Percentage consumption of different stages of *P. multidentatus* on different stages of *T. cinnabarinus* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXIV: Percentage consumption of different stages of *P. multidentatus* on different stages of *T. fijiensis* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXV: Percentage consumption of different stages of *P. multidentatus* on different stages of *R. indica* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH

Table XXVI: Percentage consumption of different stages of *P. multidentatus* on different stages of *A. destructor* in 24 hours at a temperature of 30 ± 2°C and 70 ± 2% RH.
hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXVII : Percentage consumption of different stages of *P. multidentatus* on different stages of *D. minutus* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXVIII : Percentage consumption of different stages of *P. rachelae* on different stages of *T. neocaledonicus* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXIX : Percentage consumption of different stages of *P. rachelae* on different stages of *T. cinnabarinus* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXX : Percentage consumption of different stages of *P. rachelae* on different stages of *T. fijiensis* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXXI : Percentage consumption of different stages of *P. rachelae* on different stages of *R.indica* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXXII : Percentage consumption of different stages of *P. rachelae* on different stages of *A.destructor* in 24 hours at a temperature of 30± 2°C and 70 ± 2% RH

Table XXXIII : Percentage consumption of different stages of *P. rachelae* on different stages of *D.minutus* at in 24 hours a temperature of 30± 2°C and 70 ± 2% RH

Table XXXIV : Reproductive parameters (in days) of adult female of *A. largoensis* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XXXV : Mean duration (in hours) of development of *A. largoensis* on different food items provided at laboratory conditions of 30±2°C and 70±2% RH

Table XXXVI : Reproductive parameters (in days) of adult female of *T. suknaensis* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XXXVII : Mean duration (in hours) of development of *T. suknaensis* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XXXVIII : Reproductive parameters (in days) of adult female of *A. guptai* sp. nov. on different food items at laboratory conditions of 30±2°C and 70± 2% RH

Table XXXIX : Mean duration (in hours) of development of *A. guptai* sp.
nov. on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XL : Reproductive parameters (in days) of adult female of *P.multidentatus* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XLI : Mean duration (in hours) of development of *P.multidentatus* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XLII : Reproductive parameters (in days) of adult female of *P. rachelae* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XLIII : Mean duration (in hours) of development of *P. rachelae* on different food items at laboratory conditions of 30±2°C and 70±2% RH

Table XLIV : Average number of *T.neocaledonicus* (Larva, Protonymph and Adult) and *T.suknaensis*/2.5cm² area of leaf - Field experiment
