ACKNOWLEDGEMENT

Behind every success of each person there are many known and unknown helping hands and it is always a matter of pleasure to remember and thank them at the end.

I would like to express my deep and sincere gratitude to my supervisor Prof. (Dr.) Sankar Kumar Ghosh for the continuous support of my Ph.D study and research, for his patience, motivation, enthusiasm, and immense knowledge. His unstinting support, advice and encouragement have made this work possible. His guidance helped me in all the time of research and writing of this thesis. He has inspired me to become an independent researcher and helped me realize the power of critical reasoning. I could not have imagined having a better advisor and mentor for my Ph.D study.

Besides my advisor, I would like to convey my profound gratitude to the Hon’ble Vice Chancellor and Dean, School of Life Science and Bioinformatics for giving me the opportunity to be a part of the research world in Assam University.

I would also like to convey my profound gratitude to Dr. Amin Laskar for his valuable advice, constructive criticism and his extensive discussions around my work.

Timely help from Cachar Veterinary Hospital are gratefully acknowledged.

I owe whole hearted thanks to Head, Department of Biotechnology for all the help extended at different stages of my study and providing necessary facilities for this study.

I am also thankful to all the faculty members, technical and official staffs of Department of Biotechnology. They have always extended their helping hands whenever needed.

I have encountered so many people, who have made these years exciting and fun, besides making bits and pieces of invaluable contribution, of which this work is the final outcome. I would like to thank all people who have helped and
inspired me during my doctoral study. I feel dearth of words to express my heartfelt gratitude to my fellow lab mates especially Miranda, Bijaya, Rosy, Mohua, Pradosh, Jagadish, Ruhina, Fazlur, Bishal, Anil and Javed for their constant support, sincere help and tireless and painstaking efforts throughout the duration of my study. Thanks for always being there when I need.

The kind cooperation, assistance and help from all my juniors are highly acknowledged.

My deepest gratitude goes to my parents for their unflagging love and support throughout my life; this thesis is simply impossible without them. Their devotion to my education and their subsequent faith in me have sustained and inspired me ever since. My special gratitude to my sisters for their enormous support and constant encouragement throughout this long journey.

I owe my loving thanks to my parents-in-law. Without their encouragement and understanding it would have been impossible for me to finish this work. And most of all for my loving, supportive, encouraging and patient husband Robert whose faithful support during all the stages of this Ph.D. is so appreciated. I am also indebted to my sister-in-law and family for their love and support.

I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Last but not the least; I thank God for the wisdom and perseverance that he has been bestowing upon me during the research period, and indeed, throughout my life. I am ever grateful to God, for providing me this opportunity and granting me the capability to proceed successfully.
