EXECUTIVE SUMMARY

This research work understands the global financial crisis that has occurred in 2008 – 2009. It goes ahead to understand the main causes responsible for rise of recession globally. Further it explains as how Indian economy got affected due to this financial crisis and what steps were taken by Government, RBI and Indian Corporate sector to overcome. The main focus of this study is to analyse the recessionary impact on Indian IT sector by applying the ARIMA methodology using Eviews-6 software and thereby interpreting the results. The thesis also discusses the impact of recession on Non-IT sectors. The thesis moves on as follows:

CHAPTER 1 - INTRODUCTION: In this chapter, the researcher presents the background & history of the thesis as WHY part.

CHAPTER 2 - REVIEW OF LITERATURE: In this chapter, the researcher provides theoretical foundation to the study by presenting relevant literature in tabular form.

CHAPTER 3 - RESEARCH METHODOLOGY: In this chapter, the researcher widely describes the HOW part of the study. This chapter comprises objectives of the study followed by the problem statement & Rationale of the study. The discussion also contains the scope and limitation of the study. This chapter also discusses the research type, research design, sampling, data collection, data analyzing instruments and description of ARIMA model.

CHAPTER 4 - DATA ANALYSIS AND INTERPRETATION: In this chapter, the researcher presents the results of ARIMA model and analyzes the data by using content analysis as well as by applying the Statistical tool. Finally, this chapter describes the impact of recession on Indian IT Industry and provides a brief discussion on non-IT companies too.

CHAPTER 5 - CONCLUSIONS AND SUGGESTIONS: After interpretation of the results, finally the researcher concludes the study and provides suggestions for further studies.
