---|---
I. INTRODUCTION | 1-21
  - Historical Perspective | 1-5
  - Burnout Stress Syndrome | 5-7
  - Burnout and other Stresses | 7-14
  - Factors in Burnout | 14-21
II. REVIEW OF LITERATURE | 22-47
  - Burnout Stress Syndrome | 22-25
  - Burnout and Stress | 25-26
  - Burnout and Job-stress | 27-28
  - Burnout and Role-stress | 28-30
  - Burnout and Physician Impairment | 30-32
  - Personal Factors | 32-37
  - Work-related Factors | 38-42
  - Socio-demographic Factors | 42-45
  - Overview | 45-47
III. PROBLEM AND HYPOTHESES | 48-55
  - Present Study | 51-53
  - Aims and Hypotheses | 53-55
IV. DESIGN AND METHODOLOGY | 56-67
  - Design | 56-58
  - Sample | 58-59
  - Material | 59-64
  - Procedure | 64-65
  - Rationale for using various statistical techniques | 65-67
V. RESULTS AND DISCUSSION  68-103

Part I  68-80
Effect of Type A/B Behaviour Pattern, Gender and Job-level on Emotional Exhaustion, Depersonalization and Reduced Personal Accomplishment

Part II  86-86
Correlation between Emotional Exhaustion, Depersonalization, Reduced Personal Accomplishment and Organisational Role Stress, Speed and Impatience, Job-involvement, Hard-driving and Competitiveness

Part III  86-98
Level analysis of MBI scores
Effect of TA/BBP, Gender and Job-level on Organizational Role Stress
Regression Equation between Emotional Exhaustion, Depersonalization, Reduced Personal Accomplishment and Organizational Role Stress
Analysis of Socio-demographic Variables

Overview  98-103

VI. SUMMARY  104-112

VII. SUGGESTIONS FOR FUTURE RESEARCH  113-114

REFERENCES  115-137

APPENDIX  138-167
