ACKNOWLEDGMENT

I take this opportunity to express my gratitude to Dr. J.S. Tiwari, Reader in Chemistry, for suggesting the topic of this Dissertation. It was his painstaking supervision of the work which could enable me to finish the work.

I express my deep sense of gratitude to Prof. S.G. Tandon, Head, School of Studies in Chemistry of this University, for providing facilities of space and experimentation.

My thanks are due to Ravishankar University, Raipur for the award of fellowship and to the University Grants Commission for the financial assistance.

It is a pleasure to record my thanks to the authorities of CDRI and CINAP, Lucknow, for providing spectra and other experimental facilities.

The author expresses gratitude to Dr. R.K. Mishra, Professor of Chemistry, Dr. G.L. Mundhara, Reader in Chemistry, Dr. M.L. Naik, Reader in Bioscience, Ravishankar University, Raipur and Prof. G.D. Tiwari of Govt. D.B. Girls' P.G. College, Raipur for their valuable discussions and guidance. The author expresses thanks to all the other members of School of Studies in Chemistry for their help.
I consider it my duty to inscribe my gratitude to my fellow research workers, Mr. Harsha Dubey, Mrs. Neeta Tiwari and Mr. Nidhi Rajpai for their kind cooperation and fruitful discussions.

The present study would not have been possible without the blessings of my parents and encouragement from other family members. I am indebted to all of them.

Lastly, I convey my thanks to all those who helped me directly or indirectly in the completion of this work.

(Kum.) Tripti Agrawal
