ACKNOWLEDGEMENTS

Is there Any Reward For Good-Other Than Good.

When I joined the Division of Developmental Toxicology at Industrial Toxicology Research Centre, Lucknow, Neural Transplantation as a subject was alien to me. I owe my present knowledge of the subject to the patient and painstaking efforts of Dr. (Mrs.) Raushan Husain, Assistant Director, Industrial Toxicology Research Centre, Lucknow, who as my scientific supervisor led me into the fascinating world of neurons and the neural networks literally by the finger. Indeed, for her prudence, encouragement, moral support and for the expert guidance which she rendered throughout this study, I shall ever remain indebted.

I take this opportunity to record my sincere thanks to Prof. Mohd. Athar, Head Department of Toxicology and Medical Forensicology and Dean Faculty of Science, Jamia Hamdard (Hamdard University) for his incessant help and cooperation.

It gives me pleasure to express my deep gratitude to Dr. P.K. Seth, Director, Industrial Toxicology Research Centre for his deep concern, valuable suggestions, constructive criticism and for excellent reviewing of my work from time to time. I am also grateful to him and to Dr. R.C. Srimal, former Director, Industrial Toxicology Research Centre, for providing all necessary facilities for pursuing this study.

It has been a great privilege to enjoy the fruitful scientific discussions with Dr. A.K. Agarwal and Dr. D.N. Kaichru, Scientists, Industrial Toxicology Research Centre, Lucknow. Indeed, I would never forget their cordial and friendly companionship and the occasional light moments I shared with them.

During my tenure in Industrial Toxicology Research Centre, I earned great mutual trust and tremendous support from many people. Drs. Vinod Praveen Sharma, Devendra Parmar, Alok Dhawan, Vinay Khanna, Raghib Husain, Raj Kumar Siddiqui, Sanjay Srivastava and Manta Dhawan never hesitated to help me, and by their kind assistance many difficulties which I believed insurmountable, were conquered. I am glad to render them here my thanks.

I would like to acknowledge the valuable help and cooperation of my lab colleagues especially Mr. Vivek Viswanathan, Dr. Kavita Seth, Dr. G.J.S. Flora, Ms. Kirti Bajpai, Monika, Richa, Himani, Pradeep and Maroof.
I sincerely express my thanks to Mr. Kailash Chandra, Mr. S.K. Shukla, Mr. Kanhaiya Lal, Dr. C.S. Ojha, Mr. Ugrasen, Mr. Shiv Raj Kumar, Mr. B.S. Pandey, Mr. Rajesh Mishra, Mr. Ram Lal, Mr. M.C. Misra and Mr. Kishan Lal for their cooperation and technical help rendered at various stages of the investigation. My special thanks are due to Mr. Mohd Aslam whose help and support throughout the study were invaluable.

Two people especially made a big difference in my life while I was in Lucknow. In Dr. Mohd. Junaid and Adip Roy, I found two most dependable allies. Dr. Junaid was a brotherly figure who provided the all needed moral support and help. With Adip Roy I learnt neural transplantation as a technique in a better way and he kept me upto date on the latest in transplantation. We enjoyed lunch together and the routine after lunch puffs near the river Gomti shall ever remain imprinted in my memory.

I certainly enjoyed being in the company of my friends Farrukh, Mosialhid, Wahab, Israel, Dr. Sarfaraz, Dr. Riyaz and Dr. Shadab and with whom I shared immemorable experiences.

While away from home, I literally felt at home in the company of my Phupo and Uncle. Farheen, Ifran, Humra and Nigar made all efforts to keep my nostalgia at bay.... and how shall I ever forget the pamperings of my dearest Saami.

My father played a pivotal role in shaping my academics. His understanding of my problems and his patience have been my strength and the thesis is rightly dedicated to him. I received lot of love and affection from my brothers and sister who have always stood by me through thick and thin.

I sincerely thank Mr. Pramod Kumar Srivastava, Mr. Raj Kamal Agarwal and Mr. Ashhad Ahmad Siddiqui for their excellent secretarial and computational assistance in preparation of the thesis.

Financial assistance of Council of Scientific and Industrial Research, New Delhi, is gratefully acknowledged.

Lastly, if I do not acknowledge all the experimental animals that were sacrificed during the course of this study, it shall be my callous indifference and cruel apathy towards them.

Vagar Mustafa Adhami
