List of Tables

2.1 Wheat gluten proteins and their genetic control  6
3.1 Commercial wheat varieties obtained from various research stations  23
4.1 Physical parameters of wheat Grains  37
4.2 Correlation coefficients among grain size, thousand kernel weight, hectoliter weight and kernel hardness  38
4.3 Flour quality parameters of wheat varieties  39
4.4 Solvent Retention Capacities and Alkaline Water Retention Capacity of wheat flour of different varieties  41
4.5 Correlations among physicochemical wheat flour characteristics  42
4.6 Mixing properties of dough  43
4.7 Correlation among various wheat dough strength characteristics and grain and flour quality parameters  44
5.1 Gluten composition and characterization of different wheat varieties  49
5.2 HMW-GS composition of different wheat varieties  51
5.3 Correlations among gluten composition and characteristics of different wheat varieties  52
5.4 Correlations between gluten characteristics and flour quality parameters  52
8.1 Effect of gliadins and glutenins on micro doughlab parameters  73
8.2 Effect of gliadins and glutenins on pasting characteristics  75
8.3 Texture Profile Analysis of gliadin and glutenin added dough  78
8.4 Recovery of gluten and gluten index of gliadin and glutenin added doughs  80
8.5 Correlations among mixing properties, pasting characteristics and textural properties dough  81
9.1 Characteristics of bread prepared from different wheat varieties  86
9.2 Correlations among flour parameters, dough properties, gluten subfractions and bread quality 91
10.1 Quality parameters of cookies prepared from different wheat varieties 95
10.2 Correlation among SRC profile, AWRC and cookie quality parameters 97
10.3 Correlations among different flour parameters and cookie quality 100
11.1 Calculations of the TPA parameters 105
11.2 Texture profile analysis of cooked noodles prepared from various wheat varieties 106
11.3 Relationships between flour characteristics, gluten protein composition and cooked noodle parameters 109
11.4 Prediction of textural quality of noodles using wheat flour and gluten quality parameters 110
