PREFACE

The present investigation is related to an important field of psychology. As in psychology we deal with living organisms and hence it becomes significant to study the process by which the information are processed. Although there are many factors which influence this process but individual differences in general and level of intelligence and personality traits in particular are crucial determinants of information processing. There may be many sub-system of the information processing, but the investigator intends to study the very important sub-system i.e. inspection time and attention processes. Hence, the present study is an effort to investigate the relationship between intelligence, personality and the above said processes. The study would be a significant contribution in the area of placement services and will also help in better understanding of combined role of intelligence and personality in relation to inspection time and attention process. The present study has been accomplished by the combined efforts of a number of people. It is my distinct honor and proud privilege to acknowledge my heartiest gratitude to my guide Dr. Novrattan Sharma, Reader and Head of Department of Psychology, M.D. University, Rohtak, whose guidance helped me throughout and sustained my interest during the course of study. My intellectual
debt to him is gratefully acknowledged and I welcome this opportunity to record my heartfelt gratitude and sincere thanks to him for his valuable suggestions, noble guidance, limitless patience and encouragement at every stage of not only this work but also at every stage of my academic career.

I acknowledge my sincere thanks and gratitude to Dr. Rajbir Singh, Professor, Department of Psychology, M.D. University, Rohtak, for his mature and valuable suggestions from time to time. I also express my heartfelt thanks to Dr. Amrita Yadav, Reader, Department of Psychology, M.D. University, Rohtak, for the continuous encouragement. Further, I express my deep gratitude to all the teachers and laboratory staff of Department of Psychology, M.D. University, Rohtak, for their support and co-operation. I also extend my special thanks to Dr. Radhe Shyam Sharma, Lecturer, Department of Psychology, M.D. University, Rohtak and Sh. Ashok Sharma, Lecturer, Vaish P.G. College, Bhiwani, for their necessary help in the field of statistical analysis of the data (using SPSS) which proved to be a real help.

I also express my thanks to the respondents who participated in this research work and my friends, who always extended their kind co-operation at the various stages of the work. I am also grateful to the library staff of the University and staff of National Informatics Centre, Delhi, for their co-operation in providing me
the access to the pertinent literature both printed as well as electronic.

In no less measure I am thankful to my husband Dr. S.S. Gupta, Resident Medical Officer, Civil Hospital, Gohana, who always stood by me and constantly encouraged me in my studies. My daughters, Arushi, Simran & my son Suryansh with their pleasing disposition and loving gestures has always cheered me and provided relief for me from the tensions during the course of my work.

Last but not the least, my indebtedness and regards are due to my in-laws, Dr. R.A. Gupta and Smt. Champa Devi, who always proved to be the real and natural source of inspiration to me. I also express my special thanks to Mr. Sandeep Jain and Mr. Pramod Kumar, S.I.T. Computer Centre, Gohana for their unflinching support during the typing of this work.

The support from various sources, which I received in the course of study can not be adequately acknowledged in few words. Some help, which in itself was often too small, meant the difference between success and failure. I wish to thank all the authors and institutions whom I could not mention in particular, but any way furthered the work.

Rohtak
