# LIST OF TABLES

<table>
<thead>
<tr>
<th>Sr. No</th>
<th>Name of the table</th>
<th>Page No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Showing design of the study.</td>
<td>60</td>
</tr>
<tr>
<td>2.</td>
<td>Showing the mean and standard deviation values of entire sample on various variables of the study.</td>
<td>75</td>
</tr>
<tr>
<td>3.</td>
<td>Showing the mean and standard deviation values of male group on various variables of the study.</td>
<td>77</td>
</tr>
<tr>
<td>4.</td>
<td>Showing the mean and standard deviation values of female groups on various variables of the study.</td>
<td>78</td>
</tr>
<tr>
<td>5.</td>
<td>Showing the significance of mean differences between male and female groups on various variables of the study.</td>
<td>80</td>
</tr>
<tr>
<td>6.</td>
<td>Showing normal ranges and categorization of extreme groups (high and low) from entire sample on intelligence, extraversion and neuroticism variables.</td>
<td>83</td>
</tr>
<tr>
<td>7.</td>
<td>Showing significance of mean differences between high and low intelligence groups on information processing tasks.</td>
<td>84</td>
</tr>
<tr>
<td>8.</td>
<td>Showing the significance of mean differences between high and low extraverted groups on information processing tasks.</td>
<td>88</td>
</tr>
<tr>
<td>9.</td>
<td>Showing the significance of mean differences between high and low neurotic groups on information processing tasks.</td>
<td>92</td>
</tr>
<tr>
<td>10.</td>
<td>Showing the Pearson's coefficient of correlation between various variables.</td>
<td>96</td>
</tr>
<tr>
<td>11.</td>
<td>Showing multiple regression of correct responses (in inspection time task) on other variables.</td>
<td>103</td>
</tr>
</tbody>
</table>
12 Showing stepwise multiple regression of inspection time on other variables (only significant predictors are taken) 104

13 Showing stepwise multiple regression of span of attention for dots on other variables (only significant predictors are taken) 106

14 Showing stepwise multiple regression of span of attention under without noise condition on other variables (only significant predictors are taken) 107

15 Showing stepwise multiple regression of span of attention for with noise condition on other variables (only significant predictors are taken) 108

16 Showing stepwise multiple regression of execution time in cancellation task on other variables (only significant predictors are taken) 109

17 Showing stepwise multiple regression of number of errors in cancellation task on other variables (only significant predictors are taken) 110
