PREFACE

The main stimulation for undertaking this study was the desire to explore the positive aspects of health. But a final touch for a systematic study was given by Dr. NovRattan Sharma, whose scholarly guidance helped me throughout and sustained my interest in the study. My intellectual debt on him is gratefully acknowledged and I welcome this opportunity to record my heartfelt gratitude and sincere thanks to him for his valuable suggestions, able guidance and encouragement at every stage of not only this work but also at every stage of my academic career.

I also express my sincere thanks and gratitude to Dr. Rajbir Singh, Professor and Head, Department of Psychology, M.D. University, Rohtak, for his mature and valuable suggestions from time to time. I also express my heart felt gratefulness to Dr. (Mrs.) Amrita Yadava, Professor, Department of Psychology M.D. University, Rohtak, for the continuous encouragement. Further, I express my deep gratitude to all the teachers of the Department of Psychology, M.D. University, Rohtak, for their support and cooperation.

I am also highly grateful to the library staff of the University for their cooperation in providing me the access to the pertinent literature both printed as well as electronic through internet facility.

I also place on record my since thanks to my worthy colleges and dear students at Department of Psychology Kurukshetra University, Kurukshetra for their support and good wishes.

The support from various sources which I received in the course of the study can be adequately acknowledged in few words. Some help, which in itself was often too small, mean the difference between success and failure. I wish to thank to all the authors and institutions whom I could not mention in particular, but any way furthered the research work.

Rohtak
