CONTENTS

CHAPTER -I

1. GENERAL INTRODUCTION 1-6

1.1 Basic Botanical-Info of *Cyperus rotundus* Linn

1.2 Distribution

1.3 Plant Description

1.4 Worldwide Uses of *Cyperus rotundus* Linn

2. OBJECTIVES OF THE WORK

3. FLOW CHART OF METHODOLOGY

CHAPTER –II

REVIEW OF LITERATURE 9-14

CHAPTER -III

ANTIMICROBIAL ACTIVITY OF *Cyperus rotundus* 15-30

3.1 Introduction

3.2 Materials and Methods

3.2.1 Microbial cultures

3.2.2 Plant Material

3.2.3 Preparation of the plant extract

3.2.4 Culture media

3.2.5 Antibacterial Assay

3.3 Results and Discussion

3.3.1 Antibacterial activity

3.3.2 Antifungal activity
CHAPTER –IV

ANTIOXIDANT POTENTIAL OF *Cyperus rotundus* 31-75

4.1 Introduction

4.2 Oxidative stress

4.3 Antioxidant potential of *Cyperus rotundus*

4.4 **Materials and Methods**

4.4.1 Animals

4.4.2 Drugs and Chemicals

4.4.3 Toxicity Study

4.4.4 Paracetamol-induced liver damage in rats

4.4.5 Lipid peroxidation

4.4.6 Estimation of Total Reduced Glutathione

4.4.7 Estimation of SOD

4.4.8 Estimation of Catalase (CAT)

4.4.9 Free radical scavenging activity on DPPH

4.4.10 Hydroxyl radical scavenging activity

4.4.11 Nitric oxide radical scavenging activity

4.4.12 Superoxide radical scavenging activity

4.4.13 FRAP (ferric reducing antioxidant power assay)

4.5 **Histological studies on liver and kidney of rats before and after the administration of *C. rotundus***

4.6 **Results and Discussion**

4.6.1 Free radical scavenging activity on DPPH

4.6.2 Hydroxyl radical scavenging activity

4.6.3 Superoxide radical scavenging activity

4.6.4 Nitric oxide scavenging activity(NO)

4.6.5 Ferric reducing oxidative power (FRAP) assay

4.6.6 *In vivo* Lipid Peroxidation in Liver and Kidney tissues

4.6.7 TRG levels in Liver and Kidney tissues

4.6.8 SOD activities in liver and kidney tissues

4.6.9 Glutathione peroxidase (GP<sub>X</sub>) in Liver and Kidney tissues

4.6.10 Catalase activity in liver and kidney tissues
4.7 DISCUSSION – *Invivo* Assessment

4.8 *Invitro* Assessment

4.9 Histological repairing /Protection

CHAPTER -V

IMMUNOLOGICAL STUDIES ON *Cyperus rotundus* L.  76-92

5.1 Introduction

5.2 Plant Material

5.3 Preparation of the plant extract

5.4 Preparation of Antigen

5.5 Alsevier’s solution

5.6 Animals and Treatment

5.7 Immunization

5.8 Experimental system

5.9 Haematological investigation

5.10 Immunological assays

5.11 Haemagglutination antibody titre (HA) (SRBC-Antigen)

5.12 Delayed type hypersensitivity (DTH) response in rats

5.13 T cell-E rosette assay

5.14 Results and Discussion

5.14. a DTH reaction

5.14. b Antibody production

5.14. c T cell – Rosette assay
CHAPTER -VI

ISOLATION AND PHYTOCHEMICAL CHARACTERIZATION OF BIOACTIVE COMPOUNDS FROM THE RHIZOMES OF
Cyperus rotundus. L

6.1 Introduction
6.2 Plant Material
6.3 Materials and Methods
  6.3.1 Preparation of the plant extract
  6.3.2 Column chromatography- Methanolic extract
  6.3.3 Column chromatography- Ethyl acetate extract
  6.3.4 Phytochemical Screening
  6.4.1 Preliminary screening
    6.4.2 Detection of triterpenoids
    6.4.3 Detection of Reducing sugars
    6.4.4 Detection of phenolic compounds
    6.4.5 Determination of total phenolic and tannins
    6.4.6 Determination of total flavanoid content
    6.4.7 Phytochemical Separation by using TLC Method
    6.4.8 UV – Spectrophotometry analysis
    6.4.9 GC - MS Analysis
6.5 Results and Discussion

SUMMARY AND CONCLUSION
