Acknowledgement

Pursuing a Ph.D. project is a both enjoyable and painful experience. It’s just like climbing a high peak, step by step, accompanied with encouragement, trust, bitterness, hardships, frustration, and with so many people’s kind help. When I found myself at the top enjoying the beautiful scenery, I realized that it was, in fact, teamwork that got me there. Though it will not be enough to express my gratitude in words to all those people who helped me, I would still like to give my many, many thanks to all these people.

A better work requires teamwork and collaboration, as we need an entire army of talented and intelligent people to work as one to build a superior work and that’s why Helen Keller rightly said “Alone we can do little; together we can do so much”. I wish to express my sincere gratitude to the people who have been instrumental in the successful completion of this project.

To God the father of all, I thank for the strength that keep me standing and for the hope that keep me believing that this affiliation would be possible and more interesting.

This project bears on imprint of many people. First and foremost, I express my heartfelt gratefulness to Dr. Anju P. Kunjadia, Associate Professor, Ashok and Rita Patel Institute of Integrated Study and Research in Biotechnology and Allied Sciences (ARIBAS), New Vallabh Vidyanagar for her guidance and support that I believed I learned from the best. Without her guidance, teachings, and knowledge this thesis would not have been possible. She taught me research skills a scientist should have, as well as the valuable skill of ‘thinking outside the box’. I am immensely thankful to her for constant supervision and invaluable guidance, and also for being so patient and teaching me the little details and nuances regarding my work. She provided me invaluable and critical suggestions, scientific acumen, perspicacious remarks, scholarly guidance, active persuasion and supervision, which served as a constant source of inspiration throughout the course of my study and research work. She not only taught me the science, but also the
rudiments of life. She was always beside me during the happy and hard moments to push me and motivate me. Thank you very much madam.

I sincerely extend my gratefulness to Charutar Vidyamandal (CVM) and Sophisticated Instrumentation Centre for Applied Research and Testing (SICART) for providing the platform to carry out my research work successfully in their esteemed institute. I am equally grateful to Dr. Nilanjan Roy, Head, ARIBAS and Pradip S. Patel, former Head, ARIBAS, for their generous attitude in providing necessary facilities to carry out the research work. Both have always been father figure to me and their valuable hints and active persuasion have been the major force behind completion of this study. I convey my utmost thanks to all the peons namely Arvindbhai, Dineshbhai, Manubhai, Sohilbhai, Sunilbhai and Prakashbhai and Lab. Assistants Karishma madam, Javnika madam and Ronakbhai who helped me in some or the other way during my research work.

I take this opportunity to sincerely acknowledge the Department of Animal Biotechnology, College of Veterinary Science and Animal Husbandary (AAU), Anand. I would like to express my sincere gratitude to Prof. Chaitanya G. Joshi for exposing me to the world of scientific excellence. The inspirational insightfulness, helpful comments, unflinching encouragement and stimulating suggestions provided to me during my work at their department, has made me a little more wiser than earlier with each passing day. I have learned many things form his laboratory.

I sincerely extend my gratefulness to Dr. D. N. Rank, Professor & Head, Department of AGB, AAU, Anand, Dr. Prakash G. Koringa and Dr. Shubhash J. Jakhesara, Assistant Professor, Department of Animal Biotechnology, AAU, Anand for their consistent and invaluable inspirations and for their valuable suggestions during the research work. It’s my fortune to gratefully acknowledge the support of some special individuals. I fail in words to express my earnest thanks to Dr. Prashant D. Kunjadi and Dr. Pratap N. Mukhopadhyaya for his technical help and support during the entire course of study.
Friends are part of life and without them life is vague. I can't forget love and affections received from my best friends on the way of completion, the friends who have shared the moments of laughter and sorrow can never be forgotten. I am immensely thankful to my colleagues, Kishan, Vaibhav, Reena, Shriram, Yati, Khushal, Delisha, Anand, Amit, Namratara, Nidhi, Tejas, Bhaskar, Ravi, Ankit, Brijesh, Tejas Gohel, Ghanshyam, Tarun, Hemal, Deep and Kruti, for their support and unreserved help during the course of study. Their diligent efforts made me consciously improve my own work standards. I praise the enormous amount of help and for tolerating my absurd ways.

No appropriate words could be traced in the presently available lexicon to express my gratefulness of beyond accountability to my adorable parents and grandparents and all family members who took pains to bring me to this stage of my career. Their sacrifice surpasses all materialistic achievements. When heart is full and mouth is dumb, I have no words to express my gratefulness to my brother Dinesh, Kishor, Sagar and all the sisters whose continuous inspiration, encouragement and affection, boosted up my moral during the period of study. Without their unconditional love it would have never been possible to make it.

I gratefully acknowledge the financial support from Department of Science and Technology (DST), New Delhi and Gujarat State Biotechnology Mission (GSBTM), Gandhinagar, Gujarat.

Unfortunately, I cannot thank everyone by name because it would take a lifetime but, I just want you all to know that you count so much. Had it not been for all your prayers and benedictions; were it not for your sincere love and help, I would never have completed this work. So thank you all.

Thank you for giving me strength to reach the stars and chase my dreams.

Rameshchandra J. Pandit
