LIST OF TABLES

Table 1 Etiologic classification of diabetes mellitus (ADA, 2008)

Table 2 Defects that might hamper positive and negative selection during the induction of central tolerance in NOD mice, BB rats and humans

Table 3 Defects that might hamper mechanisms of induction of peripheral tolerance in NOD mice, BB rats and humans

Table 4 Characteristics of autoimmune diabetes in NOD mice, BB rats and humans

Table 5 Family of fatty acid-binding proteins (FABPs)

Table 6 Composition of high fat diet (HFD)

Table 7 Effect of 15 days treatment with methanol extract of H. isora on STZ-induced type 1 diabetic rats

Table 8 Effect of 15 days treatment with H. isora methanol extract and different fractions on STZ-induced type 1 diabetic rats

Table 9 Effect of 15 days treatment with saponins isolated from H. isora on STZ-induced type 1 diabetic rats

Table 10 Effect of 6 weeks treatment with H. isora methanol extract and n-butanol fraction on serum lipid profile of STZ-induced type 1 diabetic rats

Table 11 Effect of 4 weeks HFD feeding, and low dose streptozotocin treatment on body weight, food and water intake, insulin sensitivity and biochemical parameters in rats

Table 12 Effect of 15 days treatment with H. isora methanol extract, different fractions, isolated saponins, pioglitazone and glipizide on the serum biochemical parameters in the HFD-STZ diabetic rats

Table 13 Effect of 15 days treatment with H. isora methanol extract, different fractions and isolated saponins, pioglitazone and glipizide on the serum urea, creatinine, SGOT and SGPT levels

Table 14 Effect of 15 days treatment with H. isora methanol extract, different fractions, isolated saponins, pioglitazone and glipizide on the serum MDA levels and antioxidant enzymes SOD (Superoxide dismutase) and Catalase in the liver tissue

Table 15 Effects of 15 days treatment with saponins and methanol extract of H. isora on serum glucose and insulin levels in C57BL/KsJ-db/db mice

Table 16 Effects of 15 days treatment with saponins and methanol extract of H. isora on serum triglyceride, total cholesterol and non-esterified fatty acid (NEFA) levels in C57BL/KsJ-db/db mice
