ACKNOWLEDGEMENT

Any task reflects the experiences, convictions and the accumulated knowledge of many and it is implicit that "Krut" must be clothed with the co-operation and blessings of the intellectuals, the learned and the elders. Hence it would require more than a mere acknowledgement to express the diverse ways in which I am indebted to everyone.

Primarily, I am profoundly and everlastingly grateful to my honorific guide and mentor, Professor Y. K. Agrawal, Head of Chemistry Department, School of Sciences, Gujarat University for his invaluable guidance and prime advice. I have been exceptionally fortunate to work under him and learn systematic and expeditious approach towards research.

Special mention must be made here of Shri C. B. Gemawat, Principal, Bhavans Science College and Shri K. J. Bhavsar, Director of Physical Education, Bhavans Science College, who helped in guiding me aright at the time when I was groping for the right course. I owe them lifelong for their countenance.

My cordial thanks are due to Dr. (Mrs.) S. K. Menon, Reader, Chemistry Department, School of Sciences for making many valuable suggestions and corrections.

I am indeed thankful to staff members of Chemistry Department who have always rendered their help at the hour of need.

Particular thanks are due to personnels of Central Drugs Research Institute (Lucknow), Bhabha Atomic Research Centre (Trombay), Ahmedabad Textile Industries Research Association (Ahmedabad) and Indian Institute of Technology (Bombay) for extending their help and assistance.

I am obliged to many of my friends and colleagues for sincere co-operation and helpful counsel.

Last but always, parents and God for what I am today...

Kunji Satish Padmanabhan
