ACKNOWLEDGEMENT

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me and their contribution in assorted ways during the making of this thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

The true feature of a teacher is his ability to understand the necessary and unnecessary assumption. It is my extreme good fortune to be associated with my research guide, Dr. Sunil Kumar, Scientist-G, Dept. of Reproductive and Cytotoxicology, National Institute of Occupational Health (ICMR), Ahmedabad. I appreciate all his contributions of time, ideas and funding to make my doctoral experience productive and stimulating. The joy and enthusiasm he has for research was contagious and motivational for me. Throughout my work, he provided encouragement, sound advice, good teaching and lots of superior ideas. His truly scientific intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth, as a student and researcher want to be. I am indebted to him more than he knows.

I am sincerely grateful to Dr. P.K. Nag, Director of this institute, for taking interest and permitting me to work.

I am also grateful to Dr. Haresh Doshi, Obstetrics and Gynaecology Dept., Civil Hospital, Ahmedabad and Dr. Vineet Mishra, Obstetrics and Gynaecology Dept., IKD, Ahmedabad for their continuous support and recommending subjects for this study. I also wish to thank Dr. Pratiksha Joshi and Mrs. Kavita Modi for their clinical support.

My sincere thanks are due to Dr. Vijay Shivgotra, Dr. Asim Saha and Dr. Raj Tiwari for their guidance in statistical analysis. A word of appreciation to Dr. L.J. Bhagya for extending his departmental facilities for the metal analysis work. I am also thankful to the Librarian and their staff for kind cooperation.

I am deeply indebted to the support and help extended to me by all the staff members of Reproductive and Cytotoxicology division. I would like to specially thanks Mr. Anil Kumar Gautam and Mr. Yogendra Verma who had provided the environment for sharing their experiences about the problem issues involved, their solutions as well as participation in stimulating team exercises. I have always been benefited by their advice and guidance. They have always kindly granted me their time even for answering some of my unintelligent questions. I also appreciate Mrs. Kamlesh Agarwal and Mrs. Bharti Shah for their unconditional help during my work.
My time at NIOH was made enjoyable in large part due to many friends that became a part of my life. I wish to extend my warmest thanks to Ms. Shruti Patel, Ms. Shagufa Shaikh, Ms. Archana Kumari, Mr. Bhavesh Mojidra, Mrs. Anitha Kartha, Mr. Rahish Ahmad, Mr. MI Idrish, Ms. Sapna Sedha and Ms. Khushbu Vaghela who helped me at various stages of this work. Thanks are due to BH Vaghela, Vijay Patni, Vinod Patni and Sagar Dalwadi for their kind help in miscellaneous things.

I am extremely thankful to my friend Mr. Mayur Joshi for arranging the probes for Fluorescent In Situ Hybridization and his help in various techniques. His unselfish and unfailing support has been very obliging for this study.

Finally, I would like to thank my family for all their love and encouragement. I dedicate my thesis to my parents who bore me, raised me, supported me, taught me and loved me. My Father, Shri Vinod Murarka, in the first place is the person who put the fundament in my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Smt. Manju Murarka, is the one who sincerely raised me with her gentle caring and compassionate love. I am indebted to my brothers, Vishal Murarka and Harsh Murarka for being so supportive and caring. No words will suffice to proper heartfelt gratitude towards my grand father late Shri. Prabhudayal Murarka and grand mother Smt. Shantidevi Murarka for their blessings.

I offer my appreciation to all the subjects who willingly co-operated with me for my study. I pray for the subjects for their well-being without whom, this work would not have been completed.

Finally, I would like to thank everybody who was important knowingly and unknowingly to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Last, but not least, I would like to thanks the omnipresent Almighty for giving me the will, patience and perseverance to complete this task.

Shiva

Ms. Shiva Murarka
