## CONTENTS

1 **Introduction**  
1.1 Cyber Crimes 2  
1.2 Evolution of Mobile Phones 3  
1.3 Mobile Phones Related Cyber Crimes 5  
1.4 Steganography and Mobile Phone Related Cyber Crimes 7  
1.5 Literature Review 8  
1.6 Topic Selection 9  
1.7 Title 11  
1.8 Objectives 12  
1.9 Details of the Remaining Chapters 13  

2 **Steganography**  
2.1 Definition 15  
2.2 How it works? 16  
2.2.1 Basics 16  
2.2.2 Components of Steganography 20  
2.2.3 Selection of Cover Media 23  
2.3 Steganography Methods 25  
2.3.1 Steganography by exploiting the image format 25  
2.4 LSB – Least Significant Bit Substitution 28  
2.4.1 Data Representation of Digital Images 28  
2.4.2 LSB2 35  
2.5 Other Algorithms 36  
2.5.1 Steganography in the image spatial domain 36  
2.5.2 Histogram based Hiding 39  
2.5.3 Steganography in the image frequency domain 39
2.5.4 F5 Algorithm 42
2.5.5 JSteg Algorithm 45
2.5.6 OutGuess Algorithm 46
2.5.7 Data Hiding in DWT 47
2.5.8 Adaptive Steganography 48

2.6 Stego Tools 51
2.7 Steganalysis 53
2.8 Steganography in Mobile / Smart Phones 56

3 Android Open Source Project 58-74

3.1 Introduction 59
3.2 Android Architecture 66
3.3 Why Android? 74

4 Implementation 75-137

4.1 Objective 77
4.2 Environment Setup 79
4.3 Downloading and Understanding Android source 90
4.3.1 Downloading 90
4.3.2 Understanding Source Code and its Hierarchy 92
4.4 Implementation of Steganography 105
4.4.1 Android source modification for implementation 105
4.4.2 An independent Java application to retrieve hidden text 114
4.5 Building custom source 131
4.6 Porting modified code 136

5 Testing and Results 138-164

5.1 Testing Work on Emulator 139
5.2 Result 152

6 Conclusion & Future Scope 165-168

APPENDIX

I BIBLIOGRAPHY 169
II RESEARCH PAPERS 173
