ACKNOWLEDGEMENT

It gives me great pleasure in expressing my indebtedness and gratitude to Dr. J.H. Shah, Head and Professor of Education, Gujarat University, Ahmedabad, as my Guide and Mentor, without whose inspiration and guidance, this report of investigation would not have seen the light of the day. I would have always like to remember him as a person of great erudition and research insight.

In the present problem, the guidance he gave me was superb and unparalleled. I thank him personally for the graceful act he evinced during my recurrent visits to him.

I thank sincerely to the pupils and principals of the schools who co-operated in my work. They threw open their schools at my disposal for the administration of the scale.

I would be disgraced if I do not express my indebtedness to my parents, brothers and my sister and daughter Abhi who tolerated my whims during all those distressing days of administration of testing, scoring and data-analysis.

Last, but not the least, I thank Master Raja who typed the manuscript neatly and with utmost accuracy.
