CONTENTS

CHAPTER 1 INTRODUCTORY 1

1.1 Introduction 1
1.2 Reasons for Adaptation of BAS 1
1.3 Statement of the Problem 1
1.4 Objectives of the Present Study 1
1.5 Definition of the terms 1
1.6 Limitations of the Study 1
1.7 Chapterization 1

CHAPTER 2 BRITISH ABILITY SCALES 13

2.1 What is BAS? 13
2.2 Brief History of Its Development 13
2.3 BAS Versus Traditional Intelligence Tests 13
2.4 Characteristics of BAS 13
2.5 Specific Features of BAS
   2.5.1 Multimodel Conception 13
   2.5.2 Constructional Model of BAS 13
   2.5.3 Contexts of Assessment 13
   2.5.4 A Cognitive Approach in Mental Measurement 13
2.6 General Outline of the BAS 13
2.7 Recent Developments 13

CHAPTER 3 CONCEPTUAL UNDERSTANDING OF RASCH MODEL 57

3.1 Introduction 57
3.2 Latent Trait Theory / Item Response Theory 57
3.3 Rasch Measurement Models 57
3.4 Importance of Item Analysis

3.5 Basic Theories of Item Analysis
3.5.1 Classical Test Theory
3.5.1.1 Test Construction And Analysis
  According to Classical Theory

3.6 Features of Latent Trait Models
3.6.1 Item Characteristic Curve (ICC)
3.6.2 Dimensionality of the Latent Space
3.6.3 Information Function
3.6.4 Local Independence
3.6.5 Estimation Procedure
3.6.6 Test Construction

3.7 Applications of Rasch Measurement
3.7.1 Item Banking
3.7.2 Test Design
3.7.3 Self-Tailoring
3.7.4 Response Validation
3.7.5 Item Bias
3.7.6 Individual Diagnosis

3.8 Further Innovations in Rasch Model

3.9 Resume

4 ADAPTATION OF BAS

4.1 Meaning of the Adaptation

4.2 Importance of the Adaptation

4.3 Rationale of the Adaptation

4.4 Specific Reasons for Adaptation for BAS

4.5 Process of the Adaptation
  4.5.1 Modifications in the Instructions of the Administration of the test
4.5.2 Modifications in the Content
4.5.3 Modifications in the Certain Words of the Test
4.5.4 Replacement of the Objects

5 DIFFERENT TRYOUTS

5.1 Introduction
5.2 Phases of Research Activity
5.3 First Tryout
   5.3.1 Selection of the Sample
   5.3.2 Administration of the First Tryout
   5.3.3 Modifications Effected after First Tryout
   5.3.4 Concluding Remarks
5.4 Second Tryout
   5.4.1 The Sample for the Second Tryout
   5.4.2 Administration of the Second Tryout
   5.4.3 Concluding Remarks
5.5 Edition of the Final Version

6 RESEARCH PLANNING AND PROCEDURES

6.1 Introduction
6.2 Methods of Sampling
   6.2.1 City Area
   6.2.2 Eastern Area
   6.2.3 Western Area
6.3 Administration of the Subscales
6.4 Experiences of the investigator during the Administration
6.5 Methods of Statistical Analysis Used
   6.5.1 Difficulty Parameter
   6.5.2 Ability Parameter
6.5.3 Difficulty (BAS)
6.5.4 Ability (BAS)
6.5.5 The Analysis of Fit

6.6 Scoring of Social Reasoning Subscale

7 ANALYSIS OF THE DATA AND INTERPRETATION

7.1 Introduction
7.2 Computation of Difficulty Values
7.3 Computation of Ability Values
7.4 Interpretation of Ability and Difficulty Values
7.5 Relation between Person's Ability and the Probability of Success
7.6 The Analysis of Fit
7.7 Assessment of Levels of Social Reasoning
7.8 Establishment of Psychometric Properties
   7.8.1 Reliability
   7.8.2 Validity

8 RETROSPECT AND PROSPECT

8.1 Summary of the Work Done
8.2 Suggestions for Further Researches

BIBLIOGRAPHY

APPENDICES

A Instructions for Administration and Scoring for Adapted BAS
B Record forms
