ACKNOWLEDGEMENT

Research is one kind of process of meditation. As to perform meditation, one has to fully concentrate on his subject, similarly to carry out research, one has to study the subject and forget everything, their own identity and everything and then and then the great hidden truth comes like a flash.

First of all, I take this opportunity to express my profound gratitude towards my esteemed guide and an ideal teacher Dr. Sunita Jain, Lecturer (selection grade), Department of Pharmacology, L. M. College of Pharmacy.

"Ideal teacher is that who come down at the level of student, understand his problem and encourage him to solve his problem by giving the right guidance and building self confidence."

With great sense of gratitude, I want to thank her for her timely suggestions, generous and friendly nature, persistent encouragement, critical remarks and counsel during the whole course of this work. Weather it was day or night, weather dry hot, cold or rainy days, without taken care of his own breakfast, meal and dinner, he always accompany me to do my work. I am really fortunate enough to have this type or “Real Friend” in my life. He is Jasmin. He always boosts up and recharges my mood with his truthful but some what funny and rigid talks.

I am profoundly indebted to my parents who had taught me all lessons of life and prepared me rough and tough to face every situation with courage. They have always boosted me and supported me all the way in life. I believe that without their care and faith in me, it was impossible for me to reach to this stage. I also regret the support given my elder brother Viren.

Finally, I would like to say that any success of this project was not possible without my innocent rats and mice.

Lastly I would like to surrender myself and my whole work at the lotus feet of Sri Thakur, Sri Sri Maa, Swamiji and my Guruji, under whose infinite blessings and imperishable power I can able to reach at this stage.

Thanks to all once again!!
