ACKNOWLEDGEMENT

The author sincerely expresses deep sense of gratitude and indebtedness to Dr. S.G. Desai, Research guide and Head, Department of Microbiology, University School of Sciences, Gujarat University, Ahmedabad, for his inspiring guidance, keen interest, encouragement, critical reading of the manuscript and moulding his research career. The author feels highly privileged and benefitted by his authoritative insight into the microbiological problems.

The author wishes to express his gratefulness to Dr. M.F. Mullakhanbhai, Chemosyn Research Centre, Vapi for introducing him to the research problem, providing useful suggestions and encouragement from time to time. The author acknowledges the cooperation and support given by Dr. W.K. Yadav, Dr. S.R. Dave, Shri B.R. Trivedi, Mrs. D.S. Shah, research colleagues Mr. B.R.M. Vyas, Mr. B.N. Yagnik, Miss S.C. Pandya, other staff members and students at the Department of Microbiology.

A special word of thanks to the authorities at Tata Chemicals Limited, Mithapur and Sambhar Salt Works, Sambhar for helping in collection of samples and providing invaluable information on these environments. The author expresses his gratitude to: Mr. A.K. Dave, Mr. V.G. Shah,
Dr. U.M. Rawal, Dr. Ranjekar & his research students (NCL, Pune - for determination of DNA base composition) and several others for their technical assistance during the course of the research work.

The author acknowledges the excellent photographic work by Shri S.B. Dholakia, and the typing by Shri B.G. Talsania and Reliable Services, Vijaynagar, Ahmedabad.

The author sincerely thanks his family members for their great forbearance over the past years during which he has been occupied with the research work.

Finally, the Junior and Senior Research Fellowship No. 9/70 (4)/84-EMR-I awarded by the Council of Scientific and Industrial Research (C.S.I.R.), New Delhi is gratefully acknowledged.
