And my success in my task can only come from Allah in Him I trust and unto Him I turn.

With a high resolve and reverence, I take this opportunity to place on my record my expression of heartfelt and deep sense of gratitude to all those who helped me give this manuscript the present form. This project has been made possible through the direct and indirect co-operation of various people for whom I wish to express my appreciation and gratitude.

Words fail to express my sense of gratitude towards the person whom we owe much, Late Hakeem Abdul Hameed sahib (May his soul rest in peace). But for his help, we could not have moved a step ahead.

Words fell short to express my sense of gratitude towards my guide and mentor Dr. A. Mujib, I am highly privileged being with such a kind and affectionate supervisor. But for his able supervision and broad scholarly vision I could not have reached this place of my life. His invaluable criticism and suggestions and pruned occasional ineptness helped me complete my work. He left no stone unturned in assisting me throughout my work round the clock. I stand indebted to him.

It has been a great privilege to have Dr. S. Umar as my co-supervisor. I am thankful to him for providing me constant encouragement, moral support and scholarly views.

My sincere thanks goes to Prof. Muhammad Iqbal, Head Department of Botany, Faculty of science, for his constant encouragement and providing necessary facilities to effectively carry out this work.
