

LIST OF FIGURES

Figure No.	Title
1	Vegetative and reproductive traits of banana (cv. Karpooravalli)
2	Explant preparation and callus induction from immature male flower buds of banana cultivar Grand Naine in MS medium
3a	Types of callus obtained from male flower buds of different cultivars of banana in MS medium with 4.0 mg/l 2,4-D, 1.0 mg/l IAA and 1.0 mg/l NAA after 3-6 months
3b	Types of friable callus obtained from male flower buds of different cultivars of banana on MS medium with 4.0 mg/l 2,4-D, 1.0 mg/l IAA and 1.0 mg/l NAA after 3-6 months
4	Effect of position of floral hand on callus induction in banana cultivar Robusta, in MS medium with 4.0 mg/l 2,4-D, 1.0 mg/l IAA and 1.0 mg/l NAA
5	Influence of genotype on callus induction in MS medium with 4.0 mg/l 2,4-D, 1.0 mg/l IAA and 1.0 mg/l NAA after 1-2 months
6	Ideal embryogenic callus obtained from male flower buds on MS medium with 4.0 mg/l 2,4-D, 1.0 mg/l IAA and 1.0 mg/l NAA after 6-9 months
7	Embryogenic cell suspension of commercial cultivars of banana derived from male flower buds in liquid MS medium with 1 mg/l 2,4-D
8	Change in composition of embryogenic cell suspension of test cultivars Rasthali and Nendran in liquid MS medium with 1 mg/l 2,4-D
9	Components of cell suspension culture obtained from male flower buds in commercial cultivars of banana in liquid MS medium with 1 mg/l 2,4-D
10	Various stages of cell division and varietal difference in cell proliferation in ECS of bananas cultivars in liquid MS medium with 1 mg/l 2,4-D
11	Regeneration of somatic embryos from viable embryogenic cells of banana cultivars in SH medium
12	Regeneration of somatic embryos from embryogenic cells of banana cultivars in modified SH medium with 0.50 mg/l picloram
13	Germination of somatic embryos incubated on various maturation medium for 30 days

14	Regeneration and germination capacity of embryogenic cell lines of banana cultivars Rasthali and Nendran at different interval of time
15	Histology of regenerating somatic embryos
16	Repetitive embryogenesis and germination of embryos obtained from immature male flower buds of commercial cultivars of Rasthali and Nendran
17	Differential germination of plantlet from embryogenic cell suspension culture of banana cultivars Rasthali and Nendran
18	Enhanced plantlet recovery through modified culture technique in cvs. Rasthali and Nendran
19	Germination, acclimatization and bunches of ECS derived plantlets in test cultivars Rasthali and Nendran
20a	Genetic fidelity test in cv. Rasthali using ISSR primer
20b	Dendrogram demonstrating the genetic relationship among ECS derived plants of cv. Rasthali based on microsatellite markers
21a	Genetic fidelity test in cv. Nendran using ISSR primer
21b	Dendrogram demonstrating the genetic relationship among ECS derived plants of cv. Nendran based on microsatellite markers
22	Schematic presentation plantlet regeneration through embryogenic cell suspension in banana
