ACKNOWLEDGEMENT

The author takes this opportunity to express deep and sincere appreciation to Professor R.K. Katti, Head of the Soil Engineering Division, Indian Institute of Technology, Bombay, for his kind help in the entire project. Dr. Katti's counsel was always available and his valuable suggestions and guidance during the course of this research have contributed much to its success.

The author also wants to express thanks to Principal T. M. Parikh, Professor S. B. Kumta, Head of Civil Engineering Department, Professor K. K. Shah, Head of Applied Mechanics Department, L.D. College of Engineering, Ahmedabad for the encouragement and the facilities provided for the conduct of the laboratory investigations. Thanks are also due to Professor K.J. Bhatt, Head of Mechanical Engineering Department, L. D. College of Engineering, Ahmedabad, for the timely help in the fabrication involved for the equipment of the project.

Finally, thanks are extended to Director, Physical Research Laboratory, Ahmedabad for permitting the use of Digital Computer IBM-1620 in carrying out the numerical computations.
