ACKNOWLEDGEMENT

It's rightly said by Johnson in his book on active learning that

"Learning is a social process that occurs through interpersonal interaction within a cooperative context. Individuals, working together, construct shared understandings and knowledge."

- Johnson, author of *Active Learning: Cooperation in the College Classroom*

There are a lot of people who probably should be on this list and who have been of importance throughout the work with this thesis, but first of all I want to express my appreciation of and gratitude to my guide Dr Anita A. Mehta, Asst. Professor L.M. College of Pharmacy, for her wisdom, good ideas and also for her encouragement, support and kindness. I acknowledge my indebtedness to her dedication, often beyond the call of duty. I am and will always be thankful to her for all her support.

I will always remain thankful to Dr Shivprakash, Director, Synchron Research Ahmedabad for introducing me to the world of metabolism and encouraging me to study phenotyping. It was his support and unselfish contributions, which made this work possible.

I will always remain thankful to Dr R.K. Goyal, Prof. Department of Pharmacology, L.M. College of Pharmacy, Ahmedabad, for his kind support, concern and enthusiasm. I would like to sincerely thank Dr Mukesh C. Gohel, Principal, L.M. College of Pharmacy, Ahmedabad for providing all the facilities for my research work.

It was my pleasure and privilege to get constant support from all the staff members of Synchron Research Services, Ahmedabad Mr. Bhavesh Dasandi for giving me the opportunity to stay in the lab at synchron and for being a true scientist and for always answering all my questions and teaching me basics of analytical chemistry. In addition I want to thank Mr Alpesh and Mr Prashant for their help and kindness.

Dr. G.B. Shah, Prof. and Head Department of Pharmacology K.B. Institute of Pharmaceutical Education and Research and Mr. D.J. Dave Asst Prof. K.B. Institute of Pharmaceutical Education and Research for valuable and creative scientific input, and for being such a nice and positive persons and Ms Nisha, Ms Anita, Dr Sanish Davis and Mrs. Mary for their statistical inputs. I am also thankful to my colleagues and staff of K.B. Institute of Pharmaceutical Education and Research, Gandhinagar and L.M. College of Pharmacy, Ahmedabad for their constant encouragement.
I would also like to sincerely thank Dr V.N. Shah, Medical Director, Sterling Hospital, Ahmedabad, for providing all the necessary help during the entire course of my work. I would like to thank Mr Dhaval, Dr Tejas and all the staff, nurses and phlebotomist of the MICU Sterling hospital, Ahmedabad.

As Aristotle rightly said, “Without friends no one would choose to live, though he had all other goods” I was also lucky to have such good friends and colleagues like Rohit, Haridatt, Himanshu, Rakesh, Shailesh, Rahul, Mitesh, Hitesh and Shailaja. I would like to thank them all for interesting discussions about science as well as other aspects of life. I have really enjoyed their company, both at work as well as outside. I would like to thank all who were directly or indirectly involved in my venture especially those who volunteered my studies.

Call it a clan, call it a network, call it a tribe, or call it a family. Whatever you call it, whoever you are, you need one. I was very fortunate to have one. I will always remain indebted to them, especially my daddy and mother who constantly encouraged me to achieve my dreams. Jyotika and Jijaji were constant support whenever I needed the most.

Last but not the least Devangi my wife for her constant encouragement, inputs, suggestions, motivation and bearing with my working schedules and Maharsh my son for his refreshing smile, which encouraged me.

Thanks

Ashtotosh Jani
