ACKNOWLEDGEMENTS

The work presented in this thesis was carried out under the guidance of Professor M.R. Deshpande. I am sincerely grateful to him for his constant encouragement and inspiration during the course of this work. His optimism and cheerful approach to Physics have left a deep impression on me. Sincere thanks are due to Professor R.G. Rastogi for introducing me to the subject of aeronomy, initial training in this field and many helpful discussions and suggestions.

The ATS-6 Ootacamund project was a joint undertaking of the Physical Research Laboratory, Ahmedabad, India and the Space Environment Laboratory, NOAA, Boulder, Colorado, USA. Thanks are due to Professor K. Davies and his group for collaboration and to Professor G. Swarup and his group at Radio Astronomy Centre, Ootacamund for facilities. This project was financially supported by NASA, USA and Department of Space, Government of India. Data from the Indian Institute of Astrophysics, Kodaikanal have been used quite extensively in the present work and for this thanks are due to Drs. J. Hanumath Sastri and B.S. Murthy.

Thanks are due to Professors K.R. Ramanathan, D. Lal, S.P. Pandya and R.V. Bhonsle for the encouragements during the course of this work. I had the privilege of being associated with Professor John A. Klobuchar during his visit to the Physical Research Laboratory, Ahmedabad, India. I thank him for wide-range discussions on many
scientific aspects related to the present work and for his keen interest in the present investigations. The scientific discussions with Professors R. Raghavarao, A. Sen, A.K. Sundaram, J.S. Shirke, R. Pratap, R.P. Kane and B.H. Subbaraya, Drs. K.S. Rao, H. Chandra, (Mrs) P. Chakrabarty, D.K. Chakrabarty and S.P. Gupta and Mr. C.S.R. Murthy have been of immense help during the course of this work. Special thanks are due to Dr. (Mrs.) P. Chakrabarty for correcting the entire manuscript and to Professor A. Sen, Dr. G. Subramanian and Mr. Benshidhar for reading some of the chapters and suggesting appropriate changes.

Thanks are also due to Miss Chhaya R. Shah and Sari K.C. Patel for their sincere computational assistance during the course of this work. I owe my gratitude to my colleagues Messrs Benshidhar, G. Sethia, N.M. Vadher, G.D. Vyas, V.P. Patel and M.B. Dadhania for many fruitful scientific and technical discussions. Many of my colleagues have helped me directly and indirectly through their dedicate efforts, to mention a few Messrs H.S. Panchal, C.B. Khopkar, V.D. Patel, H.D. Parikh and G.P. Patel and Mrs. B.K. Bhatt and S.D. Desai. I appreciate and sincerely thank Mr. P. Raghavan for neat and error-free typing of this manuscript.

I thank the Physical Research Laboratory administration for providing me all possible and desirable help for the completion of this work, especially for the facilities viz. computer centre, library, photography, drafting, documentation and workshop.
It is a matter of great pleasure to mention the names of my brother Shree Guru Dutta Sharma and my sister-in-law Smt. Sushila Sharma, who affectionately nurtured in me the initial education and dedication towards scientific studies. They have always been a source of constant encouragement for me. I owe sincere thanks to them, to all my teachers and family friends and relatives. It is very appropriate to appreciate the cooperation of my wife Sushila for seeing me through this task. She and both my sons Divya and Bhavesh have been the source of refreshment to me whenever I felt the necessity of it.

- HARI OM VITS
