

ACKNOWLEDGMENTS

I would like to gratefully and sincerely thank Prof. B. Appa Rao, Department of Physics, Osmania University for his guidance, understanding, patience, and most importantly, his motivation during my research work. He encouraged me to not only grow as an experimentalist and a physicist but also as an instructor and an independent thinker.

This thesis would not have been possible without the help, support and patience of Prof. N. Veeraiah, Department of Physics, Acharya Nagarjuna University. In addition, He also provided the experimental facilities for optical absorption and refractive index measurements.

I am extremely grateful to Head of the Department Prof. K. Venugopal Reddy, Chairman, Board of Studies of Physics Prof R. Sayanna.

I am also thankful to Prof. D.Suresh Babu, Prof. P.Yadagiri Reddy, Prof. G.Bikshamaiah, Prof. G.Prasad, Prof. C.Vishnuvardhan Reddy, Prof. M.V.Ramana Reddy, Dr. M.Srinivas and all the faculty members of the department of Physics, Osmania University for their continuous encouragement and mental support during the research course work.

I extend my sincere gratitude to the University Grants Commission, New Delhi for the award of teacher fellowship under Faculty Development Programme.

I specially thank K.Krishna Murthy Goud for his constant help during my entire work. I also thank all my co-scholars, Dr. M.Chandra Shekhar Reddy, K.Veerabhadra Rao, A. Prabhakar Reddy, E. Ramesh Kumar and P. Nageshwar Rao for their cooperation.

I am very much thankful to coordinator central instrumentation facility, Pondicherry University, for providing experimental facilities for photoluminescence studies.

I owe my special thanks to my wife Inna, my daughter Prathibha and my son Pragna Sadhan for their praying, patience and understanding when I failed to spend enough time during the research work.

- Y. Raja Rao.
