ACKNOWLEDGEMENTS

The idea of working on the behaviour of mixed-species troops of macaque came about, when I was discussing the possible PhD topic with my supervisor Dr. Anindya Sinha and doctoral committee member Dr. Ajith Kumar. Dr. Ajith Kumar told us about some mixed-species troops of rhesus and bonnet macaque which he has seen nearly three decades ago in parts of peninsular India. The rare and often neglected macaque mixed-species troop provided an opportunity to study the social behaviour in a complex system.

First and foremost, I would like to sincerely thank my supervisor Dr. Anindya (Rana) Sinha, without whom none of these could have been possible. I still remember the day, when I landed up at his door unannounced, to do a PhD under his supervision. He has been extremely patient with me and has been a constant source of encouragement for me. His insights and comments have greatly influenced me and shaped my thesis. Dr. Sindhu Radhakrishna reviewed countless draft of my papers and chapters with a smile. The numerous discussions with her has not only enhanced my work but also helped me keep a more focused look at the problems of thesis, she has been a constant source of support and encouragement.

I take this opportunity to thank my assistants Mr. Seetharam and Mr. Kakadya who assisted me in all stages of fieldwork. Their knowledge of the plants of animals of the National Park was amazing. Mr. Mane, shop-owner at Kanhari Caves and his staff were also a constant source of encouragement and helped me in finding assistant and lodging facility. They offered me food and shelter whenever the torrential rain interrupted the work, the local food they shared was way more delicious than any other food I had during my fieldwork.

Getting permissions for field research in the National Parks and Wildlife Sanctuaries could be a time consuming task, but I am grateful to Principal Chief Conservator of Forest Maharashtra, Mr. B. Majumdar, for prompt permissions. I would also like to thank Principal Chief Conservator of Andhra Pradesh, for permissions to conduct surveys in various National Parks and Wildlife Sanctuaries of Andhra Pradesh. My special thanks to Dr. P. N. Munde, Conservator of Sanjay Gandhi Wildlife Sanctuary, and Range Officer Mr. Kale for subsequent permissions and for sharing useful informations regarding the protected area. I would like to take this opportunity to
thank various forest guards, foresters, and rangers who accompanied me during the surveys. Their knowledge about the area, the flora, and fauna helped me a great deal in recording data.

I am grateful to Kakoli di, M. S. Chaitra, Divya Mudappa, T R Shankar Raman, and Anand Kumar for their account of two species, which was not indicated in the literature. This gap in information on distribution and presence of bonnet and rhesus macaques prompted me to undertake the surveys for not only the mixed-species troops but also for surveying the distribution of both the species. I wish to thank Dr. C. Srivasulu for enumerating his own sightings of bonnet and rhesus macaque in Andhra Pradesh; he also helped me in planning the surveys in Andhra Pradesh.

I am thankful to Dr. Uma Ramakrishnan, at National Centre for Biological Sciences, for supporting a part of the survey in Andhra Pradesh. Mr. R. Raghunath, at Nature Conservation Foundation, helped me with the maps and mapping software. Narayan Sharma, Robin V. Vijayan, and Debapriyo Chakraborty accompanied me during surveys of different areas. Ajith sir, Mike Huffmann da, Steve’ Dobson has also been very helpful and encouraging. I wish to thank them for their advice and support.

I wish to acknowledge Council for Scientific and Industrial Research (CSIR) for providing fellowship. The fieldwork was partially funded by CSIR contingency, and assistance from Wenner Gren Foundation and Department of Science and Technology projects on bonnet macaque. International Primatological Society, Japan, German Primate Centre, Gottingen, and Freie University, Berlin, provided grants for presenting my work in the conferences and seminars. Nature Conservation Foundation provided their facilities for stay at Mysore for interactions with its faculties and students.

NIAS PhD committee members Dr. Carol Upadhyay, Dr. Rajesh Kasturirangan has been very helpful in various matters of official works and in communication with the University. I wish to thank Sandhya, Ramesh and Shashi for their tireless support and help in matters related to day to day work at office.

I owe much to my colleagues and friends at NIAS, Narayan, Robin, Nandini, Debapriyo, Subhankar, Smriti, Sartaj, Naresh, Mayukh, Shreejata with whom I
discussed my field notes and number of ideas regarding PhD and beyond research. I thank Jafar, Kishor, Asha, Rolla, Sajinji, Murugan, Sowjanya for discussions, badminton, and food. At NCF I thank Riyaz, Rohit, Sumanta, Navinder and Atul. In Mumbai, Hemanth, Himanshu and Rajesh providing me refreshing breaks in exploring the sanctuary after long continuous period of fieldwork. A special thanks to Kakoli di, Rawgone and Shiuli for making me feel at home, during my early years in Bangalore, and also for breaking the monotony of writing-editing-discarding phase.

I would take this opportunity to thank my uncle Mr. A.K. Gangopadhyay, Mr. M.K. Ganguly, and their family, whose houses I turned into field camps for various parts of the surveys. I am indebted to their hospitality and support during numerous unexpected visits to find monkeys in the vicinity.

Lastly but most importantly, I wish to thank my family for all the support they have given during the surveys throughout India, field work in Mumbai and writing phase. My parents has been the source of my inspiration, they supported me all the time. Elder brothers, Jay and Deep, and sister-in-law Smriti have been very encouraging and supportive of my work. During the delayed and erratic dispatch of fellowships I have been making calls from remotest corners of India to them for help. I thank them for the love and care they have given me.

There are numerous people who helped me in various aspects of thesis work; I wish to thank them all. I have tried to mention most of the people who have been instrumental in works related to this thesis, however, if I have missed someone please forgive me.
