ACKNOWLEDGEMENTS
Man is instinctively born inquisitive and one of his powerful instincts has been to know more and more about his own body. Modern medical science is the sum total of the continuity of researches made over hundreds of years by the most eminent men of science. These great masters, who were truly the pioneers in their fields, delved deep into the mysteries of the human body. Blessed indeed are those pioneers who for a better and healthier living of man, have been whole-heartedly dedicating their lives, at the cost of their personal comfort and ease, to the fulfilment of the mission of their lives. One of such living pioneers is Prof. Dr. Mahdi Hasan, Director, Interdisciplinary Brain Research Centre, J.N. Medical College, Aligarh Muslim University, Aligarh, who is respectfully regarded as an intellectual giant amongst the most eminent men of science, not only in India but also in the most progressive countries of the world where science has made great strides. His masterly grasp of the subject under study, his efficiency as one of the most competent and successful teachers and his thought-provoking researches have reverently endeared him to one and all. It has been indeed my sheer good luck to learn a little at his feet and to have been blessed with his guidance based on his vast knowledge and wide experience of over three decades. But for his unstinted guidance and almost fatherly help, it would have not been possible for me to submit this thesis, because his timely and spontaneous encouragement came to my rescue many a time when despondency loomed large over me.
To Prof. Dr. M.M. Agarwal, Chairman, Department of Zoology, Aligarh Muslim University, Aligarh, I owe a deep sense of gratitude for his assistance in the preparation of this thesis. His ability, knowledge and experience have been a great asset to me as his pupil over the years and I shall remain ever grateful to him.

I shall never forget Dr. (Mrs.) S.V. Chandra, Director, Industrial Toxicological Research Centre, Lucknow for her words of encouragement and her assistance in the present work.

Prof. Dr. B.N. Dhawan, Director, Central Drug Research Institute, Lucknow deserves my special thanks for granting me permission to work in the Biochemistry Section of the CDRI in connection with the biochemical investigations for the work presented in this thesis, and also I owe my heart-felt gratitude to Dr. N.K. Kapoor and Dr. Ramesh Chander, Scientists in the CDRI, Lucknow for their invaluable suggestions made after critical discussions.

Dr. A.C. Shipstone, Emeritus Scientist, CDRI, Lucknow, Dr. S.C. Maitra, Dr. V.K. Bajpai and Mrs. Abha Arya of the Electron Microscopic Section of the CDRI have been of great help to me in connection with the present work. I owe great thanks to them.

I am immensely thankful to Dr. S.H.M. Abdi, Professor, Department of Anatomy, J.N. Medical College, Aligarh Muslim University, Aligarh for his critical suggestions and words of encouragement.
My colleagues, Dr. (Miss.) Yagana Bano, Dr. Fakhrul Islam, Dr. Priti Vadhava, Dr. Naseem Ahmed Khan, Dr. S.M.Z. Naqvi, Dr. M.H. Lottian, Dr. S.H. Farahani and Mr. Ishrat Jameel deserve my thanks for their friendly nice suggestions, cooperation and words of encouragement during the preparation of the present work.

Dr. (Miss.) Vinita Singh, my colleague and great friend, deserve special thanks for her discussions, suggestions and words of encouragement to me when I was working in the CDRI in connection with this thesis. My sincere thanks also due to Dr. Pratima Gupta a great friend of mine for helping me in the presentation of this work.

I shall be failing in my duty if I do not express my thanks to Mr. Bose, Mr. Lal, Technicians in the laboratory of the Biochemistry Section of the CDRI and To Mr. Dinesh Kumar, the laboratory attendant for their cooperation while working in the CDRI.

Mr. Shaukat Ali Khan and Mr. Shahabuddin, STA, Department of Anatomy, J.N. Medical College, A.M.U., Aligarh helped me a lot in the technical work and I am grateful to them for their cooperation. Mr. Wasi Khan, STA is also acknowledged for his help in the electron microscopy work.

I must thank Mr. Syed Mohammed and Mr. S.M. Hashim, Artists, Department of Anatomy, J.N. Medical College, A.M.U., Aligarh, who were very helpful to me in the preparation of charts and figures connected with this thesis.
I am thankful to Mr. S. Mujeer, Mr. Mansoor A. Khan and Mr. Wajid Husain, Central Photography and Audiovisual Section for their help in the preparation of photographs needed for the present work. The late Mr. Suresh Chandra, STA, Department of Medicine, deserves my thanks for the help rendered to me in some of laboratory investigation.

Mr. Samdhani and Mr. Syed M. Rais Zaidi, 2-3, Champion Market, Anupshahr Road, Aligarh, the typists deserve my thanks for typing out the present thesis. I deem it my sacred duty to thank many a well wishers like Mr. Aleem Ahmed, STA and Mr. Shaukat Ali, TA of the Department of Community Medicine, J.N. Medical College, A.M.U., Aligarh who in their own way helped me in my pursuit of this work.

Shri Rishipal Singh and all the members of his family deserve my special thanks for making my stay with them very comfortable at Aligarh and for providing solace to me at home in the evening after the day-long hard work put in by me in the presentation of the present thesis.

I have no words to express my deep gratitude to my respected father, who sacrificed his every thing for my studies and academic pursuits right from my childhood. But for his unstinted ever-willing, spontaneous and tireless efforts, I could have never reached the present stage of presenting this thesis. My mother's discomfort in sparing me from the daily household chores enabled me to devote my time wholeheartedly to my studies and I must thank her for the same. My younger sister Archana Gupta and my younger brother Akshaya Kumar Gupta deserve my thanks for their affectionate obedience to me during the preparation of my thesis.
I convey my respectful thanks to my TAOOJI (father's elder brother) Shri S.P. Gupta for his blessings and affectionate exhortations which inspired and invigorated me to finish this thesis.

Sincere thanks are due to Prof. Dr. Mahdi Hasan for permitting me the free utilization of his personal gift (Orthoplan light microscope) which was presented to him in 1977 by Alexander van Humboldt Foundation of Germany. I should also like to thanks the Humboldt foundation for their magnificent gift (now valued at about Rs.6,00,000/=) to our beloved Prof. Dr. Mahdi Hasan.

I gratefully acknowledge the financial assistance granted to me by the Indian Council of Medical Research, New Delhi without which the preparation and presentation of this thesis would have not been possible.

ACHLA GUPTA
