Every journey has its hardships, but after its successful completion these become our experience and the memory and regards of those who helped us sail through it lingers in our minds. First and foremost, all praise and thanks to ALLAH, the Almighty, who enabled me finish the course of my journey towards producing this thesis in stipulated time and in the present form. Below the skies, there are a great number of people whose contributions, in miscellaneous ways, to the research and compiling of this work deserves special mention. It is a pleasure to humbly acknowledge my gratitude to all of them.

I owe my deepest thanks to Prof. Abdul Bari for his supervision, stimulating suggestions and guidance from the very early stage of my research, as well as, for sharing with me his extraordinary experiences throughout this work. Above all, and what was most needed, he provided me with unflinching encouragement and support in umpteen number of ways. His sympathetic behaviour and helpful nature is worth mentioning.

I would like to record my sincere gratitude towards Prof. A.H. Khan, Chairman, Department of Statistics and Operations Research, A.M.U., for providing all the possible research facilities in the department. I am also indebted to my teachers Prof. M.Z. Khan, Prof. M.M. Khalid, Prof. Jameel Ahsan, Prof. Mohd. Yaqoob, Prof. Qazi Mazhar Ali, Prof. I.A. Khan, Prof. Athar Ali, Dr. Arshad, Dr. Kamalullah, Dr. Shakeel Javed, Dr. Haseeb Athar, and Dr. Rafeequallah. They taught me during my graduate and post graduate programs and helped me in coming this far. Thanks a lot to you all!

I take this opportunity with much pleasure to thank Prof. (Retd.) Sanaullah Khan, who first taught me the integer programming. His involvement, with his originality, has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. Apart from the subject of my research, I learnt a lot from him, which I am sure, will be useful in different stages of my life.

I am grateful to the non teaching staff of my department for their cooperation. Special thanks to Firoz bhai and Rizwan bhai in the seminar library.
Many thanks to my friends in different universities, particularly Tariq, Zafar, Naushad and Talha bhai, for sending me the research papers related to my topic. Thanks to Saud for helping me with writing the computer program.

My seniors were always there to help me and I benefited a lot from them. I thank my seniors Drs. Quazzafi Rabbani, Zaki Anwar, Qazi Shoib, Teg Alam and Maroof.

I am very much thankful to my research colleagues Bakhshi bhai, Faizan, Jahangir, Naji, Ziaul, Saiful, Yashpal, Irfan, Arvind, Rahul, Imtiyaz, Izhar, Shamsher and Devendra for their support, help and encouragement.

Life in a hostel is never easy. I am very much indebted to my seniors there to help me settle in the new place. Farhan bhai, Ahsan bhai, Muzaffar bhai, Misbah bhai and Manzar bhai were the few of them whose love and affection will be remembered for ever.

I was fortunate enough to find friends like Noor Alam, Mohib, Israr, Asif, and Amadoo whom I have always found standing by me whenever I needed them the most. There were many others, especially my junior friends in Sulaiman Hall for whom I have a special place in my heart. Their love and brotherly attitude were the source of constant charge to my inner self. I Dua for their success in every walk of life.

I would like to thank Tariq bhai, Seema appi, Kashif and Atif with whom I always felt at home, away from home.

Finally, this thesis would not have been possible without the confidence, endurance and support of my family members. My family has always been a source of inspiration and encouragement for me. I wish to thank my Abbu, Late Mr. Mohd. Asim Adhami and Ammi whose love, teachings and support has brought me this far. I wish to thank Khala, Appi and Bhai for their affection, encouragement and love.

I gratefully acknowledge the financial support from U.G.C. for awarding me the university fellowship.
