ACKNOWLEDGEMENT

The accomplishment of this endeavour would not have been feasible without the will of Almighty Allah, for it is his blessings alone, which provided me enough zeal to present this thesis.

It is my great privilege to express my deep sense of gratitude and indebtedness to my esteemed supervisor Dr. (Mrs.) Subuhi Khan, Sr. Lecturer, Department of Mathematics, Aligarh Muslim University, Aligarh. I immensely owe to her, for the erudite and scrupulous guidance, judicious criticism, magnificent devotion and sympathetic attitude that have been instrumental in getting the work completed.

I extend my sincere thanks to Prof. M. A. Pathan, Chairman, Department of Mathematics, Aligarh Muslim University, Aligarh, for his benevolence and providing me all possible facilities available in the department. Moreover, University Fellowship (J. R. F), has been quite a big help for me throughout.
I am grateful to Dr. Kaleem Raza Kazmi, Sr. Lecturer, Department of Mathematics, Aligarh Muslim University, Aligarh, for his fullest cooperation and valuable suggestions. I express my deep appreciation to all my colleagues and friends particularly Nakhat Ara Naqvi, Archana Mittal and my roommate Shaheen for their most cordial and helpful role during the entire work period.

My sincere thanks are also due to office and seminar staff for their cooperation and nice behavior.

No words of acknowledgement can be expressed for the appreciation and inexhaustible encouragement, I received from my parents and brothers Tariq and Wasiq. Their unstinted support has always been a driving force behind my work and is the base of all my success.
