It also envisages that while granting a license the commission will take into consideration the terms and conditions on which such cable operator was registered and keeping in view the objectives of the proposed legislation. Furthermore during this period the applicant shall continue to be governed by the repealed Act.

STATEMENT OF OBJECTS AND REASON

1. Convergence connoting the provision of different kinds of services over the existing infrastructure and the enhancement of existing technologies so as to provide a wide variety of services is a relatively new phenomena; in addition the rapid technological developments are leading to an inability to predict the emergence of new services. The existing legislations are proving inadequate in dealing with the emerging scenario of convergence. Furthermore, the existing licensing and registration powers and the regulatory mechanisms for the telecom, information technology and broadcasting sectors are currently spread over different authorities. Therefore a flexible type of legislation to accommodate and encourage permutation and combination of technologies and services is required. The Communication Convergence Bill proposes to establish a structured mechanism to promote, facilitate and develop in an orderly manner the carriage and content of communications (including broadcasting, telecommunications and multimedia) in the scenario of increasing convergence of technologies.

2. The Bill aims at facilitating development of national infrastructure for an information based society, and to enable access thereto; providing a choice of services to the people with a view to promoting plurality of news, views and information; establish a regulatory framework for carriage and content of communications in the scenario of convergence of
telecommunications, broadcasting, data-communication, multimedia and other related technologies and services; and establish the powers, procedures and functions of a single regulatory and licensing authority and of the Appellate Tribunal.

3. These objectives are proposed to be achieved by setting up an autonomous body to be known as Communications Commission of India with wide ranging powers, duties and functions. The head office of the proposed Commission shall be located at Delhi, and its regional offices shall be located at Kolkata, Chennai and Mumbai. The Commission shall consist of a chairperson, not more than ten Members and the Spectrum Manager as an ex-officio Member. The chairperson and Members, other than the ex-officio Member, shall be appointed by the Central government from amongst persons of eminence recommended by a Search Committee from fields such as literature, performing arts, media, culture, telecommunications, law, broadcasting technology, information technology, finance etc.

4. The Bill proposes to combine and bring under the purview of the Commission the licensing and registration powers and the regulatory mechanisms for the telecom, information technology and broadcasting sectors. It is also proposed to replace large number of categories of license with the following five broad categories to enable service providers to offer a range of services within each category, namely: -

(a) to provide or own network infrastructure facilities;
(b) to provide networking services;
(c) to provide network application services;
(d) to provide content application services;
(e) to provide value added network application services

5. This flexible licensing regime is expected to optimize the use of resources and encourage the development of infrastructure. The information technology enabled services such as call centers, electronic-commerce, tele-banking, tele-education, tele-trading, tele-medicine, videotex, video conferencing shall not be licensed under this legislation and all the facilities and services exempted from licensing or registration immediately before the commencement of this legislation shall continue to be so exempt, until otherwise notified.

6. The Commission is envisaged to be involved in the assignment of the spectrum; it will carry out frequency management, planning and monitoring for non-strategic or commercial usage of spectrum; determine appropriate tariffs and rates for services; facilitate and regulate all matters relating to the carriage and content of communications; promote competition; take measures to protect consumer interest and promote and enforce universal service obligations; formulate and lay down codes and technical standards and norms to ensure in a technology neutral manner the quality and interoperability of services and network infrastructure facilities; report and make recommendations either suo motu or on such matters as may be referred to it by the Central Government etc.

7. The Commission is also proposed to be empowered with dispute resolution functions and will have the power to appoint Adjudicating Officers. It is also proposed to set up an Appellate Tribunal, to be known as the Communications Appellate Tribunal, to hear appeals against decisions or orders of the Commission, or against orders of Adjudicating officers imposing civil liabilities. The jurisdiction of the Appellate Tribunal may be exercised by its Benches, which shall ordinarily sit at Delhi and at such other places as may be notified. The Appellate Tribunal shall consist of a Chairperson and not more than six members. The Chairperson of the Appellate Tribunal shall be a person who is, or has been, a judge of the Supreme Court and shall be appointed in consultation with the Chief Justice of India. The members of the Appellate Tribunal shall be appointed from amongst persons recommended by the Search Committee and they should be, or should have been, Judges of High Court or should have held the post of secretary to the Government of India or any equivalent post in the Central Government or a State Government for a period of not less than two years, or should be persons who are proficient in any of the fields specified for appointment as Members of the Commission.
8. The Bill proposes to repeal the following legislations namely:
(a) The Indian Telegraph Act 1885.
(b) The Indian Wireless Telegraphy Act 1933.
(c) The Telegraph Wires (Unlawful possession) Act 1950.
(d) The Telecom Regulatory Authority of India Act 1997.
(e) The Cable Television Networks (Regulation) Act 1995.

9. The Bill also provides that with effect from the dates of establishment of the Commission and of the Appellate Tribunal, the Telecom Regulatory Authority of India and the Telecom Disputes Settlement and Appellate Tribunal respectively, established under the Telecom Regulatory Authority of India Act 1997, shall stand dissolved and proceedings pending before them shall stand transferred and deemed to be pending respectively before the Commission and the Appellate Tribunal.

10. The bill seeks to achieve the above objectives.
