ACKNOWLEDGMENT

First and foremost, I would like to express my sincere gratitude to Prof. Pramod Tandon, Supervisor of my doctoral programme. He provided me the opportunity to join the Plant Biotechnology Laboratory, Department of Botany, North Eastern Hill University and instilled in me the challenge of working on *Nymphaea*, in particular *Nymphaea tetragona*, a plant locally endemic to Meghalaya. This initiative ultimately led me to the field of plant diversity and phylogeny. His interest on conservation of plant genetic resources, particularly those endemic to the North-eastern region, has inspired me a lot. I hugely acknowledge the support, guidance, and motivation given throughout the course of my doctoral programme.

I would like to extend my heartfelt gratitude to Dr. Suman Kumaria, Joint-supervisor of my doctoral programme for her continuous support and encouragement, valuable guidance and motivation throughout my research activity. I am indebted to my supervisors for having faith in my capabilities and allowing me to work on this subject with unlimited and constant help on all aspects necessary for the successful completion of my doctoral programme.

I would like to express my gratitude to Prof. Satyawada Rama Rao of the Department of Biotechnology and Bioinformatics, North Eastern Hill University, Shillong. He emphasizes on the importance of studying the internal transcribed spacers (ITS) regions in *Nymphaea*. The use of this marker has led to significant findings. His valuable suggestion, comments, and instant help are greatly appreciated.

I would like to thank Prof. M. S. Dkhar and Prof. N. Venugopal, former and present Head of the Department of Botany, North Eastern Hill University, Shillong for the necessary help extended during my research period.

Furthermore, I would like to express my gratitude to Prof. N. K. Chrungoo of the Department of Botany, North Eastern Hill University, Shillong for the valuable suggestions made on the synopsis prepared for registration to the doctoral programme. Also, I am indebted to Dr. A. Pattanayak, Principal Scientist, ICAR, North-eastern region, Umiam for providing me with valuable suggestions at the
initial stage of my doctoral work. I am grateful to Dr. R. Gogoi, Botanical Survey India, Shillong for necessary help in procuring *N. nouchali* JD 02.

I am grateful to Dr. Shailendro Goel, Prof. Donald H. Les, Dr. Ziheng Yang, and Dr. Joe Felsenstein for valuable suggestions on the ITS paper, hybrid detection, performing PAML, and incorporating HMM categories in Phylip, respectively.

I acknowledge the University Grants Commission for awarding me the Rajiv Gandhi National Fellowship.

I would like to express my warmest gratitude to all my colleagues and staff members of the Plant Biotechnology Laboratory, Department of Botany, North Eastern Hill University, Shillong for their necessary help and cooperation. Many thanks are due to Tarionglin Mawblei, Stadwelson Dohling, Shrawan Kumar, Paromik Bhattacharyya, Viki Manners, Dinesh Kumar for accompanying me in numerous field trips. I am indebted to the staff of Bioinformatics Centre, North Eastern Hill University, Shillong and colleagues of the Plant Biotechnology Laboratory, Department of Biotechnology and Bioinformatics, North Eastern Hill University, Shillong for their necessary help.

I would like to express my deep gratitude to my friends Rakshak Kumar, Macmillan Nongkhlaw, and Shiveirou Raomai for their untiring encouragement and loving support. Thanks for being there and standing behind me. I very much enjoyed the time with you all.

My heartfelt gratitude goes to my dearest mom and dad, Kerlinda Dkhar and David Giri Massar, my dear brothers Marbud, Jonathan and Markyl, my loving sisters Nadia and Lydia, my lovely and amazing grandmother Silvereen Dondor Banks and all my relatives for their unremitting support and blessings. This work is dedicated to you all.

I would like to thank God for His unseen presence and guidance, immense motivation and strength bestowed upon me, and most importantly for providing me with good health that enables me to successfully complete my doctoral programme in the stipulated time period.

THANK YOU!

Jeremy Dkhar
